

## Study Guide for Microeconomics

By Phillip David, Michael, Miller

### Study Guide for Microeconomics (Microeconomics)

Microeconomics is the study of the behavior of individuals and firms in making decisions about how to allocate resources. It is the study of the choices that individuals and firms make about how to use scarce resources.

### What is the basic economic problem? (Microeconomics)

The basic economic problem is the problem of scarcity. Scarcity is the condition in which the demand for a good or service exceeds the supply of that good or service. This is the basic economic problem because it is the condition that gives rise to the need for economic decisions.

### What are the three types of resources? (Microeconomics)

The three types of resources are land, labor, and capital. Land is the natural resources that are used in production. Labor is the human resources that are used in production. Capital is the man-made resources that are used in production.

### What is the production process? (Microeconomics)

The production process is the process by which inputs are transformed into outputs. It is the process by which resources are used to produce goods and services. The production process is the central part of the economy.

### What are the three types of markets? (Microeconomics)

The three types of markets are perfect competition, monopoly, and oligopoly. Perfect competition is a market in which there are many buyers and sellers, and no single buyer or seller has the power to influence the market price. Monopoly is a market in which there is only one seller, and the seller has the power to influence the market price. Oligopoly is a market in which there are a few sellers, and the sellers have the power to influence the market price.

### What is the demand curve? (Microeconomics)

The demand curve is a graph that shows the relationship between the price of a good and the quantity demanded. It is a downward-sloping curve that shows that as the price of a good decreases, the quantity demanded increases. The demand curve is one of the most important concepts in microeconomics.
