Program SPP 1489 Algorithmic and Experimental Methods in Algebra Geometry and Number Theory which was established
and generously supported by the German Research Foundation DFG from 2010 to 2016 The goal of the program was to
substantially advance algorithmic and experimental methods in the aforementioned disciplines to combine the different

development of freely available open source computer algebra systems and their interaction in order to create powerful new
computational tools that transcend the boundaries of the individual disciplines involved The book covers a broad range of
topics addressing the design and theoretical foundations implementation and the successful application of algebraic
