 Refinery Configuration Design An accessible easy to read introduction to the methods of mixed integer optimization with  
 practical applications real world operational data and case studies Interest in model based approaches for optimizing the  
 design of petroleum refineries has increased throughout the industry in recent years Mathematical optimization based on  
 mixed integer programming has brought about the superstructure optimization method for synthesizing petroleum refinery  
 configurations from multiple topological alternatives Model Based Optimization for Petroleum Refinery Configuration Design  
 presents a detailed introduction to the use of mathematical optimization to solve both linear and nonlinear problems in the  
 refining industry The book opens with an overview of petroleum refining processes basic concepts in mathematical  
 programming and applications of mathematical programming for refinery optimization Subsequent chapters address  
 superstructure representations of topological alternatives mathematical formulation solution strategies and various modeling  
 frameworks Practical case studies demonstrate refinery configuration design refinery retrofitting and real world issues and  
 considerations Presents linear nonlinear and mixed integer programming approaches applicable to both new and existing  
 petroleum refineries Highlights the benefits of model based solutions to refinery configuration design problems Features
