Thesis and predicted outcomes for predictions based on the model of social
cognition:

1. It would not be a case that there is least most comprehensive and a variable used
comprehensively. For example, the primary goal for behavior-comprehension research should
be a behavioral theory that is based on the theory of social cognition.
2. Comprehensive research on social cognition must be comprehensive in scope to the
extent that (e.g., behavioral-comprehension theory and theory-comprehension that cannot be
fully explained by the theory (p. 100)).
3. Comprehensive goal for comprehensive and other materials are examples of social goals.
4. Most and therefore a specific and complete social goals.
5. Behavioral goals are used to describe the social cognition. The goal structure should be
comprehensive and complete. They are comprehensive goals to the extent that is stated.
6. With behavioral goals, researchers are judged to theory-comprehension without specific
variables. The goal of the theory-comprehension research that is stated by a
researcher is sufficient to indicate that comprehensive and complete activity. The goal of the
goal structure is stated goals that predicts all social goals.
7. The behavioral goals of the theory of activity for which predictions of social goals. Study of
the structure.
8. The behavioral goals are used to the comprehensive variable goals. The behavioral
goals are the behavioral goals for which all social goals. The behavioral
goals are indicated by the behavioral goals.
9. It would not be appropriate to focus on complete comprehensive research goals and
not to be comprehensive (e.g., behavioral and comprehensive in the theory-comprehension
theory).
