Sarcopenia Dominique Meynial-Denis, 2019-11-20 *Sarcopenia Molecular Cellular and Nutritional Aspects* describes the progressive loss of skeletal muscle mass and strength defined by Rosenberg in 1997 as a hallmark of aging and referred to as sarcopenia. As life expectancy continues to increase worldwide, sarcopenia has become a major public health issue. The condition worsens in the presence of chronic diseases, accelerating its progression. Sarcopenia is not considered to be a process of normative aging but, according to the International Classification of Disease Tenth Revision Clinical Modification ICD 10 CM, as a disease. As sarcopenia is an ineluctable process, prevention and management are the only options to promote healthy aging; these actions should perhaps be taken during youth. Included in this book: Features essential information on sarcopenia, its current definition, and molecular and cellular aspects of this disease; Discusses the development of physical frailty, a complication of sarcopenia, and predicts its occurrence in the older population; Presents alterations in muscle protein turnover and mitochondrial dysfunction in the aging process; Provides data on the negative involvement of sarcopenia in certain chronic diseases; Describes presbyphagia or age-related changes in the swallowing mechanism in older people; Details possible strategies to combat muscle wasting in healthy older adults and their limits. This book features information collected from pioneers or experts on human aging from around the globe, including Europe, Brazil, Canada, Japan, and the United States. It is a valuable source of information for nutritional scientists, medical doctors, sports scientists, food scientists, dietitians, students in these fields, and for anyone interested in nutrition. We hope this book provides a better understanding of sarcopenia, which inevitably occurs with aging without weight loss. Moreover, this book will supply information outlining strategies to prevent or limit muscle wasting due to normal aging in order to promote successful aging. [Brain & Behavior](#)
