Domestic and Foreign Mutual Funds in Mexico Jasmine Xiao, 2015-05-13 This paper utilizes a new dataset of foreign and domestic mutual funds in Mexico to assess their behavior and obtains three new findings First foreign mutual funds are more sensitive to global financial conditions and engage more in herding and positive feedback trading than domestic mutual funds notably during episodes of market stress Second the behavior of foreign funds differs substantially across types of funds bond funds are more sensitive to global factors and engage more in positive feedback trading than equity funds funds sold to retail investors open end funds small funds and regional funds also appear to be less stable sources of capital flows Third there is indicative evidence that foreign funds trading behavior is associated with higher local market volatilities notably in periods of market stress however domestic mutual fund investors played some mitigating role

Rethinking the Economics of Land and Housing Josh Ryan-Collins, Toby Lloyd, Laurie Macfarlane, 2017-02-28 Why are house prices in many advanced economies rising faster than incomes Why isn't land and location taught or seen as important in modern economics What is the relationship between the financial system and land In this accessible but provocative guide to the economics of land and housing the authors reveal how many of the key challenges facing modern economies including housing crises financial instability and growing inequalities are intimately tied to the land economy Looking at the ways in which discussions of land have been routinely excluded from both housing policy and economic theory the authors show that in order to tackle these increasingly pressing issues a major rethink by both politicians and economists is required

Comparing the Performance of Logit and Probit Early Warning Systems for Currency Crises in Emerging Market Economies Mr. Fabio Comelli, 2014-04-17 We compare how logit fixed effects and probit early warning systems EWS predict insample and out of sample currency crises in emerging markets EMs We look at episodes of currency crises that took place in 29 EMs between January 1995 and December 2012 Stronger real GDP growth rates and higher net foreign assets significantly reduce the probability of experiencing a currency crisis while high levels of credit to the private sector

increase it We find that the logit and probit EWS out of sample performances are broadly similar and that the EWS performance can be very sensitive both to the size of the estimation sample and to the crisis definition employed For macroeconomic policy purposes we conclude that a currency crisis definition identifying more rather than less crisis episodes should be used even if this may lead to the risk of issuing false alarms *The Traffic Bulletin*, 1924 *Rediscovering Economic Policy as a Discipline* Nicola Acocella, 2018-07-26 Government interventions in market failures can encounter objections from those who doubt their efficacy Acocella a leading expert on economic policy counters these unfounded criticisms making the convincing case for the foundation coordination and reach of government action through economic policy Arguing for the governmental potential to devise democratic fair and effective institutions and policies this book also demonstrates the validity of the principles outlined by Frisch and Tinbergen amongst others for controlling the economy in a strategic context equivalent to the rational expectations assumption Demonstrating how unconventional monetary policies such as macro prudential regulation new fiscal rules and new forms of international policy coordination can offer an effective response to the multiplicity of current economic issues the recent financial crisis arguably indicates that economic policy must once again take centre stage as the applied complement to mainstream economic theory **Contemporary Issues in Development Finance** Joshua Yindenaba Abor, Charles Komla Delali Adjasi, Robert Lensink, 2020-12-29 Contemporary Issues in Development Finance provides comprehensive and up to date coverage of theoretical and policy issues in development finance from both the domestic and the external finance perspectives and emphasizes addressing the gaps in financial markets The chapters cover topical issues such as microfinance private sector financing aid FDI remittances sovereign wealth trade finance and the sectoral financing of agricultural and infrastructural projects Readers will acquire both breadth and depth of knowledge in critical and contemporary issues in development finance from a philosophical and yet pragmatic development impact approach The text ensures this by carefully integrating the relevant theoretical underpinnings empirical assessments and practical policy issues into its analysis The work is designed to be fully accessible to practitioners with only a limited theoretical economic background allowing them to deeply engage with the book as useful reference material Readers may find more advanced information and technical details provided in clear concise boxes throughout the text Finally each chapter is fully supported by a set of review questions and by cases and examples from developing countries particularly those in Africa This book is a valuable resource for both development finance researchers and students taking courses in development finance development economics international finance financial development policy and economic policy management Practitioners will find the development impact policy and conceptual analysis dimensions insightful analysing and designing intervention strategies
