Emergency Planning Course, 1990 *Emergency Planning for Maximum Protection* Richard Gigliotti, Ronald Jason, 1991. As a practical reference for anyone entrusted with the lives and property of others, Emergency Planning helps its readers prepare for a variety of situations from bomb threats to fires to nuclear disasters. The authors of this book recognize the need for updated emergency planning. The blueprints in the appendices are useful plans for dealing with such specific emergencies as labor strikes, hurricanes, and terrorist actions. While most large governmental entities are prepared to deal with nearly all types of contingencies and emergencies, many communities and companies have few plans detailing how to respond to and recover from such events. The purpose of this book is to stimulate thought on the part of the reader, provide some practical solutions to problems that could be encountered, and offer a number of considerations for formulating emergency plans. The authors have combined their years of knowledge and experience to create some sample plans for the reader to use as models for developing site-specific plans. *Emergency Planning Manual* Marcom Marketing, [Handbook of Emergency Management Concepts](#) Michael L. Madigan, 2017-12-06. This book provides a step-by-step process that focuses on how to develop, practice, and maintain emergency plans that reflect what must be done before, during, and after a disaster in order to protect people and property. The communities who preplan and mitigate prior to any incident will be better prepared for emergency scenarios. This book will assist those with the tools to address all phases of emergency management. It covers everything from the social and environmental processes that generate hazards to vulnerability analysis, hazard mitigation, emergency response, and disaster recovery. *Federal Emergency Management Agency Incident Management Handbook* Federal Emergency Management Agency (U.S.), 2018-05-11. The Federal Emergency Management Agency (FEMA) is responsible for coordinating the delivery of federal support to state, local, tribal, and territorial governments under Presidential emergency or major disaster declarations or to other federal agencies under the concept of federal-to-federal support. It is important to recognize that FEMA does not assume responsibility for local incident command activities but instead provides a structure for the command, control, and coordination of federal resources to state, local incident commands, and other end users. The FEMA Incident Management Handbook (IMH) is a tool to assist FEMA emergency management personnel in conducting their assigned missions in the field. The IMH provides information on FEMA's incident level operating concepts, organizational structures, functions, position descriptions, and key assets and teams. The IMH is intended for use by FEMA personnel deployed at the incident level. However, the IMH also provides whole community stakeholders operating in a FEMA facility information about key incident level FEMA functions. The concepts in the IMH are applicable to FEMA operations during Stafford Act-based Presidential declarations and non-Stafford Act incidents involving federal-to-federal support.
