Rundle, Alireza Bahadori, Ken Doust, 2019-05-30 This volume outlines a progressively staged process focused on fostering a more effective more efficient and greener global construction industry The research based book commences with an evaluation of eight methodologies identified after a worldwide literature and compliance review It is followed by a more detailed report on four of these options with the ultimate objective of independent selection within the construction engineering community of a single most appropriate methodology as the approach for further more detailed investigation The eight methodologies were selected against six key performance indicators developed as assessment criteria and include knowledge management lean construction construction contract procurement practices

optimal work duration on site construction site waste rationalization of construction safety regulations sustainable construction labor force and portfolio project development A primary outcome of the selected methodology being atriple bottom line benefit to key stakeholders commercially and also to the ecology along with the community at large Front end construction waste strategies to serve as best practices to minimize waste generated by construction projects was the methodology selected for detailed research The text also covers the primary sources of construction waste The book is ideal for civil and construction engineers as well as project developers managers and public sector waste management specialists

Applications of Wet-End Paper Chemistry Che On Au, I. Thorn, 2013-06-29 Commercial demands and increasing global competition have led to enormous mechanical evolution over recent years Twin wires wide nip presses steam boxes and speed sizers have all played a part in improving both the productivity and quality of paper and board products With the emphasis on mechanical and electrical engineering and the ever increasing pressures of quality measurement and control little time has been available within a technical department for much reflection on the chemistry of the process Thus there is a growing trend for the management of the wet end to be delegated to the chemical supplier. The advances in scale of paper manufacture environmental sensitivity and higher quality of end product requirements have all had an impact on the chemistry of the wet end The increased production means for example that down time is more of an anathema now when capacity is critical Similarly with the greater rigours of quality management anything which causes breaks or holes must be eradicated Environmental pressures too are growing on the papermaking process Even if consideration is restricted to only the closure of the white water circuit it alone throws down a challenge to the potency of biocides retention aids and other chemicals These chemicals are detriment ally affected by an increasing concentration of water soluble pulp extractives and surfactants adhesives and polysaccharides from broke and recycled paper **APSC-CCE PDF-Assam Combined** Competitive Exam General Studies Paper II General Mental Ability, Logical Reasoning And Analytical Ability.Subject Chandresh Agrawal,nandini books, 2024-06-25 SGN The APSC CCE Assam Combined Competitive Exam General Studies Paper II General Mental Ability Logical Reasoning And Analytical Ability Subject Covers Objective Questions From Various Competitive Exams With Answers
