Describe some common disorders of the endocrine system?

**Diabetes:** Diabetes mellitus is a chronic disease that results in failure to release and/or produce insulin properly enough insulin is needed for normal glucose in blood. In type 1 diabetes, the immune system kills the cells that release insulin. In type 2 diabetes, the cells that release insulin become resistant to insulin. Diabetes mellitus is a chronic disease that results in failure to release and/or produce insulin properly enough insulin is needed for normal glucose in blood. In type 1 diabetes, the immune system kills the cells that release insulin. In type 2 diabetes, the cells that release insulin become resistant to insulin.

**Hyperthyroidism:** Hyperthyroidism is a condition in which the thyroid gland produces too much of the hormone thyroxine. This hormone causes the body's metabolism to speed up, which can lead to weight loss, increased heart rate, and other symptoms.

**Hypothyroidism:** Hypothyroidism is a condition in which the thyroid gland produces too little of the hormone thyroxine. This hormone causes the body's metabolism to slow down, which can lead to weight gain, decreased heart rate, and other symptoms.

**Addison's Disease:** Addison's disease is a condition in which the adrenal glands produce too little of the hormones cortisol and aldosterone. This can lead to weakness, fatigue, and other symptoms.

**Cushing's syndrome:** Cushing's syndrome is a condition in which the body produces too much of the hormone cortisol. This can lead to weight gain, increased blood pressure, and other symptoms.

**Hashimoto's thyroiditis:** Hashimoto's thyroiditis is a condition in which the immune system attacks the thyroid gland, leading to hypothyroidism.

*Essentials of Human Behavior* Elizabeth D. Hutchison, 2016-08-11 *Essentials of Human Behavior* combines Elizabeth D. Hutchison's two volume *Dimensions of Human Behavior* to present a multidimensional framework for understanding human behavior. Integrating person, environment, and the life course, this best-selling text leverages its hallmark case studies and balanced breadth and depth of coverage to help readers apply theory and general social work knowledge to unique practice situations. Now in four color and available with an interactive eBook, the Second Edition features a streamlined organization, the latest research, and original SAGE video to provide the most engaging introduction available to human behavior.

**Endocrine Evaluation** Ian Ramsey, 2006      Middle School Life Science Judy Capra, 2000. Student activities provide the hands-on experiences that are so important for middle-grade learners. They are used to introduce concepts, thus providing time for exploration. They are also used to reinforce concepts by providing students with opportunities to apply what they have learned. An activity consists of the following components: Introductory Paragraphs connect topics with previous lessons or to students' experiences; Focusing Questions provide the activity's purpose and encourage students to make decisions; Materials show reduced versions of worksheets and data pages; Procedures state group size, specifies the assignment, and emphasizes safety precautions; Analysis Questions encourage higher-level thinking, requiring students to interpret their data; Conclusions require that students bring closure to an activity based on actual, not predicted, results; Extension Activities are often interdisciplinary and encourage students to learn more through an activity or research project. The readings build on students' experiences and help them learn from the activities. Some of the components are the same as those in the activities. Subheadings provide reading clues. Illustrations reinforce and clarify the text. Analysis Questions range from being pure recall to fairly abstract. They require that students think about the concepts and may have students personalize or otherwise apply the concepts. Extension Activities provide opportunities for career exploration. Boxed Items often appear at the end of a lesson to extend the concepts it presents. Science Words is a listing of roots, prefixes, and suffixes that help students understand the terms used in this program. Thinking Like a Scientist summarizes how students learn science in this program. The comprehensive index lists the topics and terms that students may want to look up. For each technical term, a boldfaced entry shows where students can find its definition and the term used in context.      The Power of the Adolescent Brain Thomas Armstrong, 2016-07-12. Moody, Reckless, Impractical, Insecure, Distracted. These are all words commonly used to describe adolescents. But what if we recast these traits in a positive light? Teens possess insight, passion, idealism, sensitivity, and creativity in abundance, all qualities that can make a significant positive contribution to society. In this thought-provoking book, Thomas Armstrong looks at the power and promise of the teenage brain from an empathetic, strength-based perspective and describes what middle and high school educators can do to make the most of their students' potential. Thoroughly grounded in current neuroscience research, the book explains what we know about how the adolescent brain works and

proposes eight essential instructional elements that will help students develop the ability to think make healthy choices regulate their emotions handle social conflict consolidate their identities and learn enough about the world to move into adulthood with dignity and grace Armstrong provides practical strategies and real life examples from schools that illustrate these eight key practices in action In addition you ll find a glossary of brain terms a selection of brain friendly lesson plans across the content areas and a list of resources to support and extend the book s ideas and practices There is a colossal mismatch between how the adolescent brain has evolved over the millennia and the passive rote learning experiences that are all too common in today s test obsessed educational climate See the amazing difference in school and beyond when you use the insights from this book to help students tap into the power of their changing brains
