I'm Sorry About the Clock Thomas Pendleton,1993 Pendleton that virtually none of these temporal incoherences seem to have been noted before Moreover this study departs from the critical consensus that the earlier drafts of the novel are evidence of Fitzgerald's consummate artistry Among the discoveries presented here are that Fitzgerald made no use of the 1922 calendar that he did not work out the novel's time scheme until after completing about half of the manuscript version possibly because he intended Gatsby to be much longer and that quite

probably he attempted to disguise at least some of the book's temporal misplacements and contradictions. Further, this study shows that even the most praised of Fitzgerald's revisions, his relocation of materials dealing with Gatsby's past, so as to gradually reveal his secret, was apparently without exception accompanied by faulty temporal connections to the plot line.

Long-term Research and Development in Science Education Avi Hofstein, Abraham Arcavi, Bat-Sheva Eylon, Anat Yarden, 2021-10-25 Over the past 50 years, the Department of Science Teaching at the Weizmann Institute of Science in Israel was actively involved in all the components related to curriculum development, implementation, and research in science, mathematics, and computer science education, both learning and teaching. These initiatives are well-designed and effective examples of long-term developmental and comprehensive models of reforms in the way science and mathematics are learned and taught. The 16 chapters of the book are divided into two key parts. The first part is on curriculum development in the sciences and mathematics. The second describes the implementation of these areas and its related professional development. Following these chapters, two commentaries are written by two imminent researchers in science and mathematics teaching and learning: Professor Alan Schonfeld from UC Berkeley, USA, and Professor Ilka Parchman from IPN at the University of Kiel, Germany. The book, as a whole, as well as its individual chapters, are intended for a wide audience of curriculum developers, teacher educators, researchers on learning and teaching of science and mathematics, and policy makers at the university level interested in advancing models of academic departments working under a common philosophy yet under full academic freedom.
