The book is divided into six sections that cover the physics and chemistry of nuclear medicine, besides associated quality assurance, quality control, procedures, dosimetry, and radiation biology. SPECT and PET imaging instrumentation, plus CT imaging technology in hybrid modalities, data analysis including image processing, reconstruction, radiomics, image degrading, correction techniques, along with image quantitation and kinetic modeling. Within these sections, particular attention is paid to recent developments and the advances in knowledge that have taken place since release of the first edition in 2011.
