18 contemporary peace processes conducted by leading international scholars There is no standard model of peace processes
and all will vary according to the context type of conflict timing national and global economic climate and factors like natural
disasters Therefore making comparisons between peace processes is difficult but it is beneficial indeed imperative and is the
principal motivation behind this volume What works in one context may not work in another but it can be modified and
adapted to fit another context The book is structured to maximise comparison between processes and the case studies
chosen are topical and span the major regions of the world The concluding chapter systematically compares the case studies
around 11 variables that cover the conflict context peace process procedures the responsiveness of the peace process to
demands and levels of participation and inclusion Each peace process is then given a numeric score according to each of
these variables and the book thereby reaches judgements on whether each case can be termed a success or a failure This
book will be essential reading for students of peace studies conflict resolution war and conflict studies security studies and IR
