Given the increasing focus on the economic power of some developing countries, for example, the 2013 Human Development Report's 'Rise of the South', it is particularly appropriate and timely. NP The book's findings are based on rigorous empirical examination of South-South trade and finance and it provides an even-handed assessment from the perspective of long-term development goals rather than mainstream welfare approaches or ideological/theoretical worldview. NP This work directly engages with the new developmentalism literature.

that has challenged the neoliberal orthodoxy and its policy approach which focuses on liberalization privatization and deregulation It also engages with literature by examining whether the increase in South South trade facilitates or inhibits the possibilities for developmentalist economic policy in developing countries The book shows concrete and positive results from South South trade particularly related to industrial development and also documents how South South trade is dominated by large developing countries and that South South trade liberalization may be counterproductive

The Nigerian Cocoa Industry and the International Economy in the 1930s Olisa Muojama,2018-07-27 Periodic cycles and waves are characteristics of global capitalism The contraction in world trade during the Great Depression of the 1930s stands out as the strongest adverse shock to international trade in modern history This book uses the Nigerian cocoa industry s encounter with the world economy of the 1930s to knit together a gamut of themes ranging from the social formations of production to the

forces of demand and supply and price fluctuations and stabilization as well as the protest movements against monopoly capitalism It examines the Nigerian cocoa industry within the international economy of the inter war years in order to demonstrate how the dynamics of the international capitalism of the 1930s such as the Great Depression and the fluctuations in commodity prices affected the cocoa industry and the peasant cocoa producers in colonial Nigeria It provides an interesting case study of the impact of international capitalism on the periphery economy as well as the consequences of economic dependence on the external market This book will be an indispensable resource for historians economists anthropologists and the general reader with an interest in the areas of international political economy depression economics world commodity trade and agriculture and its related industries

The Political Economy of Electricity Mark Cooper, 2017-04-24 Providing critical insights that will interest readers ranging from economists to environmentalists policymakers and politicians this book analyzes the economics and technology trends involved in the dilemma of decarbonization and addresses why aggressive policy is required in a capitalist political economy to create a sea change away from fossil fuels The environmental damage across the globe is a result of the success of capitalist industrialism 250 years of carbon pollution resulting from consumption of fossil fuels to drive the economy and the worldwide aspiration to ever increasing levels of economic development But capitalism has also produced the tools to solve the problems it has created in the form of a technological revolution in low carbon renewables distributed resources and intelligent systems to integrate supply and demand This book comprehensively examines the political economy of electricity and analyzes the challenge of transforming today's electricity sector to meet the dual goals of decarbonization and development expressed in the Paris Agreement Author Mark Cooper defines the dilemma of development and decarbonization as the great challenge facing the electricity industry and documents how the economic resources costs of a 100 percent renewable portfolio has declined to the point that decarbonization can pay for itself making the low carbon renewable technologies that enable desired environmental and public health benefits an easy sell He identifies the substantial benefit of increasing use of information communications and advanced control technologies shows how targeted innovation could speed the transition by a decade or two and lower the overall cost of the transition by as much as half and explains why the flexible multi stakeholder approach of the Paris Agreement is the correct approach
