Memorandum Of Engineering Science August 2004 Paper:

Defense Industrial Base Capabilities Study: Battlespace Awareness, January 2004 , A Collection of the 2004 ASME Wind Energy Symposium Technical Papers at the 42nd AIAA Aerospace Sciences Meeting and Exhibit ,2004 Emergency Research Ethics A.M. Viens,2017-03-02 The essays selected for this volume focus on issues that arise when attempting to design review and undertake research involving human participants who are experiencing a private or public emergency The main themes discussed by the essays are the distinctive and significant ethical questions as to how research participants can be treated during emergency settings the ethical challenges raised by emergencies for researchers undertaking research and its effects on the nature of research pursued and procedural obstacles raised by emergencies which can affect the quality of good research ethics review The volume is unique in that it is the first collection to exclusively deal with all of the central ethical aspects of conducting human subject research in the context of emergency The Square Kilometre Array: An Engineering Perspective Peter J. Hall,2006-01-19 The Square Kilometre Array SKA Project is a global project to design and construct a revolutionary new radio telescope with of order 1 million square meters of collecting area in the wavelength range from3mto1cm It will have two ders of magnitude greater sensitivity than current telescopes and an unprecedented large instantaneous eld of view These capabilities will ensure the SKA will play a leading role in solving the major astrophysical and cosmological questions of the day see the science case at www.skatelescope.org/pages/page_astronom.htm The SKA will complement major ground and space based astronomical facilities under construction or planned in other parts of the electromagnetic spectrum e g ALMA JWST ELT XEUS The current schedule for the SKA foresees a decision on the SKA site in 2006 a decisiononthedesignconceptin2009 constructionofthe rstphase international path nder from2010to2013 andconstructionofthefullarrayfrom2014to2020 The cost is estimated to be about 1000 M TheSKAProjectcurrentlyinvolves45institutesin17countries manyofwhich are involved in nationally or regionally funded state of the art technical devel ments being pursued ahead of the 2009 selection of design concept This Special Issue of Experimental Astronomy provides a snapshot of SKA engineering act ity around the world and is based on presentations made at the SKA meeting in Penticton BC Canada inJuly2004 Topicscoveredincludeantennaconcepts so ware signal transport and processing radio frequency interference mitigation and reports on related technologies in other radio telescopes now under construction Further information on the project can be found at www.skatelescope.org **Verified Software: Theories, Tools, Experiments** Bertrand Meyer,James Woodcock,2008-07-07 A Step Towards Verified Software Worries about the reliability of software are as old as software itself techniques for allaying these worries predate even James King s 1969 thesis on A program verifier What gives the whole topic a new urgency is the conjunction of three phenomena the blitz like spread of software rich systems to control ever more facets of our world and our lives our growing impatience with deficiencies and the development proceeding more slowly alas than the other two trends of techniques to ensure and verify

software quality In 2002 Tony Hoare one of the most distinguished contributors to these advances over the past four decades came to the conclusion that piecemeal efforts are no longer sufficient and proposed a Grand Challenge intended to achieve over 15 years the production of a verifying compiler a tool that while processing programs would also guarantee their adherence to specified properties of correctness robustness safety security and other desirable properties As Hoare sees it this endeavor is not a mere research project as might normally be carried out by one team or a small consortium of teams but a momentous endeavor comparable in its scope to the successful mission to send a man to the moon or to the sequencing of the human genome

Ethics of Spying Jan Goldman,2009-12-14 *Ethics of Spying A Reader for the Intelligence Professional* Volume 2 picks up where the first book ended but with a twist The book begins with an historical perspective of the expectations of moral and ethical conduct of personnel working in intelligence In a previously classified memo from 1941 and a report from 1954 the reader gets a sense of both the history and perception of what was expected of professional conduct as viewed from government officials The first half of this book seeks to define an intelligence professional while the second half of the book seeks to utilize various theoretical and practical perspectives The richness of this publication is aided by the international views of its authors which hail from Israel the United Kingdom Switzerland and the United States among others These prominent scholars explore ethics through the intelligence cycle and how ethics is evolving and viewed in a post 9 11 world The book concludes with a survey on ethical conduct by interrogators a brief history of intelligence reform and a bibliography on this subject The history and international perspectives provided in this book lay the foundation for further study in this increasingly prominent field of interdisciplinary study
