Swing and Day Trading Thomas N. Bulkowski, 2013-01-22 Comprehensive coverage of the four major trading styles. *Evolution of a Trader* explores the four trading styles that people use when learning to trade or invest in the stock market. Often beginners enter the stock market by buying and holding onto a stock, value investing. That works well until the trend ends or a bear market begins. Then they try position trading. This is the same as buy and hold except the technique sells positions before a significant trend change occurs. Swing trading follows when traders increase their frequency of trading, trying to catch the short-term up and down swings. Finally, people try day trading by completing their trades in a single day. This series provides comprehensive coverage of the four trading styles by offering numerous tips, sharing discoveries, and discussing specific trading setups to help you become a successful trader or investor as you journey through each style. *Trading Basics* takes an in-depth look at money management, stops, support, and resistance and offers dozens of tips every trader should know. *Fundamental Analysis and Position Trading* discusses when to sell a buy-and-hold position, uncovers which fundamentals work best, and uses them to find stocks that become 10-baggers, stocks that climb by 10 times their original value. *Swing and Day Trading* reveals methods to time the market swings, including specific trading setups, but it covers the basics as well, such as setting up a home trading office and how much money you can make day trading.
