Duesberg,2012-12-06 Despite enormous efforts over 100 000 papers and over 22 billion spent by the US taxpayer alone the HIV AIDS hypothesis has failed to produce any public health benefits no vaccine no effective drug no prevention no cure not a single life saved Is the science system to be blamed Has science failed to reveal the truth about AIDS In AIDS Virus or Drug Induced two dozen scientists scholars and journalists have investigated the status quo of AIDS research Most of them have questioned the HIV AIDS hypothesis before but have since been censored and sociologically excluded from AIDS research politics and journalism Here they are united for the first time to put on trial the HIV AIDS hypothesis There are those who acquit HIV entirely Others who make a case for HIV as a necessary but not a sufficient cause of AIDS And one medical scientist who together with the huge AIDS literature defends the hypothesis that HIV is sufficient to cause AIDS The book convincingly reveals that the scientific method could very well find a solution to AIDS but only if ideas can be exchanged freely and if the HIV monopoly can be broken AIDS Virus or Drug Induced illustrates that the solution to AIDS could be as close as one of several very testable and very affordable alternatives to the unproductive HIV AIDS hypothesis SPIN ,1990-01 From the concert stage to the

dressing room from the recording studio to the digital realm SPIN surveys the modern musical landscape and the culture around it with authoritative reporting provocative interviews and a discerning critical ear With dynamic photography bold graphic design and informed irreverence the pages of SPIN pulsate with the energy of today s most innovative sounds Whether covering what s new or what s next SPIN is your monthly VIP pass to all that rocks *Global Lessons from the AIDS Pandemic* Bradly J. Condon, Tapen Sinha, 2008-07-22 We began to research for this book in 2000 with the idea that we might contribute to the search for solutions to the global HIV AIDS pandemic by combining perspectives from different disciplines Much has happened in the intervening years First the severity of the HIV AIDS pandemic in sub Saharan Africa and the threat it posed for many others regions of the world led to a movement among several countries to correct the imbalance between producers and users of pharmaceutical products This effort produced a clarification of the right of governments to produce generic medicine under compulsory licenses and an amendment of the World Trade Organization s TRIPS Agreement to allow exports of generic medicines from one WTO Member to another In 2007 the amended rules were put into practice with Canada authorizing the export of generic antiretroviral drugs to Rwanda However at the same time global patent laws have been undermined due to regulatory capture most notably in free trade agreements and through political pressure on countries like Thailand to not to exercise their right to issue compulsory licenses for pharmaceutical products Second the amount of money available for the treatment and prevention of HIV AIDS has increased dramatically with the establishment of the World Bank Multi Country HIV AIDS Program for Africa MAP the Global Fund to Fight AIDS Tuberculosis and Malaria and the US President s Emergency Plan for AIDS Relief PEPFAR among other funding initiatives
