Grading for Growth David Clark, Robert Talbert, 2023-07-03 Are you satisfied with your current and traditional grading system Does it accurately reflect your students learning and progress Can it be gamed Does it lead to grade grubbing and friction with your students The authors of this book two professors of mathematics with input from colleagues across disciplines and institutions offer readers a fundamentally more effective and authentic approach to grading that they have implemented for over a decade Recognizing that traditional grading penalizes students in the learning process by depriving them of the formative feedback that is fundamental to improvement the authors offer alternative strategies that encourage revision and growth Alternative grading is concerned with students eventual level of understanding This leads to big changes Students take time to review past failures and learn from them Conversations shift from why did I lose a point for this to productive discussions of content and process Alternative grading can be used successfully at any level in any situation and any discipline in classes that range from seminars to large multi section lectures This book offers a comprehensive introduction to alternative grading beginning with a framework and rationale for implementation and evidence of its effectiveness The heart of the book includes detailed examples including variations on Standards Based Grading Specifications Grading and ungrading of how alternative grading practices are used in all kinds of classroom environments disciplines and institutions with a focus on first hand accounts by faculty who share their practices and experience The book includes a workbook chapter that takes readers through a step by step process for building a prototype of their own alternatively graded class and ends with concrete practical time tested advice for new practitioners The underlying principles of alternative grading involve Evaluating student work using clearly defined and context appropriate content standards Giving students helpful actionable feedback Summarizing the feedback with marks that indicate progress rather than arbitrary numbers Allowing students to revise without penalty using the feedback they receive until the standards are met or exceeded This book is intended for faculty interested in exploring alternative forms of learning assessment as well as those currently using alternative grading systems who are looking for ideas and options to refine practice

Sustainable and Economic Waste Management Hossain Md Anawar, Vladimir Strezov, Abhilash, 2019-11-25 This book compiles research findings directly related to sustainable and economic waste management and resource recovery Mining wastes and municipal urban domestic industrial and agricultural wastes and effluents which contain persistent organic contaminants nanoparticle organic chemicals nutrients energy organic materials heavy metal rare earth elements iron steel bauxite coal and other valuable materials are significantly responsible for environmental contamination These low tenor raw materials if recycled can significantly address the demand supply chain mismatch and process sustainability as a whole while simultaneously decreasing their impacts on human life and biodiversity This book summarises the large volume

of current research in the realm of waste management and resource recovery which has led to innovation and commercialisation of sustainable and economic waste management for improved environmental safety and improved economics Key Features Reviews the key research findings related to sustainable and economic resource recovery and waste management techniques Discusses minimizing waste materials and environmental contaminants with a focus on recovering valuable resources from wastes Examines the potential uses of mining waste in the re extraction of metals provision of fuel for power plants and as a supply of other valuable materials for utilisation processing Presents research on recycling of municipal urban domestic industrial and agricultural wastes and wastewater in the production and recovery of energy biogas fertilizers organic materials and nutrients Outlines topical research interests resulting in patents and inventions for sustainable and economic waste management techniques and environmental safety **Mark Lane Express**, 1917

WORLD'S ECONOMIC AND COMMERCIAL GEOGRAPHY Dr. Haridas B. Jogdankar, Biopolymers for Medical Applications Juan M. Ruso, Paula V. Messina, 2017-02-17 This book presents an experimental and computational account of the applications of biopolymers in the field of medicine Biopolymers are macromolecules produced by living systems such as proteins polypeptides nucleic acids and polysaccharides Their advantages over polymers produced using synthetic chemistry include diversity abundance relatively low cost and sustainability This book explains techniques for the production of different biodevices such as scaffolds hydrogels functional nanoparticles microcapsules and nanocapsules Furthermore developments in nanodrug delivery gene therapy and tissue engineering are described **Role of CD1- and MR1-restricted T cells in Immunity and Disease** Kazuya Iwabuchi, Luc Van Kaer, 2019-10-18 CD1 and MR1 are major histocompatibility complex MHC class I related proteins that bind and present non peptide antigens to subsets of T cells with specialized functions CD1 proteins typically present lipid antigens to CD1 restricted T cells whereas MR1 presents vitamin B based ligands and a variety of drugs and drug like molecules to MR1 restricted T cells The CD1 family of antigen presenting molecules has been divided into two groups Group 1 contains CD1a CD1b and CD1c and Group 2 contains CD1d Additionally CD1e is expressed intracellularly and is involved in the loading of lipid antigens onto Group 1 CD1 proteins Humans express both Groups 1 and 2 CD1 proteins whereas mice only express CD1d Group 1 CD1 proteins present lipid antigens to T cells that generally express diverse T cell receptors TCRs and exhibit adaptive like functions whereas CD1d presents lipid antigens to subsets of T cells that express either diverse or highly restricted TCRs and exhibit innate like functions CD1d restricted T cells are called natural killer T NKT cells which includes Type I or invariant NKT iNKT cells expressing semi invariant TCRs and Type II NKT cells expressing more diverse TCRs CD1 restricted T cells have been implicated in a wide variety of diseases including cancer infections and autoimmune inflammatory and metabolic diseases Additionally NKT cells have been targeted for immunotherapy of disease with ligands such as galactosylceramide for iNKT cells or sulfatide for Type II NKT cells Like iNKT cells MR1 restricted T cells express semi invariant TCRs and display innate like functions MR1 restricted T cells also

called mucosal associated invariant T MAIT cells have been implicated in immune responses against a variety of pathogens such as Mycobacterium tuberculosis Pseudomonas aeruginosa Helicobacter pylori hepatitis C virus and influenza virus Moreover these cells contribute to autoimmune and inflammatory diseases including colitis rheumatoid arthritis psoriasis lupus and diabetes *Van Nostrand's Scientific Encyclopedia* Douglas M. Considine, Glenn D. Considine, 2013-12-11

Advancements in science and engineering have occurred at a surprisingly rapid pace since the release of the seventh edition of this encyclopedia Large portions of the reference have required comprehensive rewriting and new illustrations Scores of new topics have been included to create this thoroughly updated eighth edition The appearance of this new edition in 1994 marks the continuation of a tradition commenced well over a half century ago in 1938 Van Nostrand's Scientific Encyclopedia First Edition was published and welcomed by educators worldwide at a time when what we know today as modern science was just getting underway The early encyclopedia was well received by students and educators alike during a critical time span when science became established as a major factor in shaping the progress and economy of individual nations and at the global level A vital need existed for a permanent science reference that could be updated periodically and made conveniently available to audiences that numbered in the millions The pioneering VNSE met these criteria and continues today as a reliable technical information source for making private and public decisions that present a backdrop of technical alternatives *100% Clean, Renewable Energy and Storage for Everything* Mark Z. Jacobson, 2020-10-01

Numerous laws including the Green New Deal have been proposed or passed in cities states and countries to transition from fossil fuels to 100% clean renewable energy in order to address climate change air pollution and energy insecurity This textbook lays out the science technology economics policy and social aspects of such transitions It discusses the renewable electricity and heat generating technologies needed the electricity heat cold and hydrogen storage technologies required how to keep the electric power grid stable and how to address non energy sources of emissions It discusses the history of the 100% Movement which evolved from a collaboration among scientists cultural leaders business people and community leaders Finally it discusses current progress in transitioning to 100% renewables and the new policies needed to complete the transition Online course supplements include lecture slides answers to the end of chapter student exercises and a list of extra resources Lubricant Additives Leslie R. Rudnick, 2017-07-12

This indispensable book describes lubricant additives their synthesis chemistry and mode of action All important areas of application are covered detailing which lubricants are needed for a particular application Laboratory and field performance data for each application is provided and the design of cost effective environmentally friendly technologies is fully explored This edition includes new chapters on chlorohydrocarbons foaming chemistry and physics antifoams for nonaqueous lubricants hydrogenated styrene diene viscosity modifiers alkylated aromatics and the impact of REACH and GHS on the lubricant industry **Regulatory Transformations** Bettina

Lange, Fiona Haines, Dania Thomas, 2015-09-10 The issue of whether transnational risk can be regulated through a social

sphere goes to the heart of what John Ruggie has described as embedded liberalism how capitalist countries have reconciled markets with the social community that markets require to survive and thrive This collection located in the wider debates about global capitalism and its regulation tackles the challenge of finding a way forward for regulation It rejects the old divisions of state and market citizens and consumers social movements and transnational corporations as well as economic and social regulation Instead this rich multidisciplinary collection engages with a critical theme the idea of harnessing the regulatory capacity of a social sphere by recognising the embeddedness of economic transactions within a social and political landscape This collection therefore explores how social norms practices actors and institutions frame economic transactions and thereby regulate risks generated by and for business state and citizens A key strength of this book is its integration of three distinct areas of scholarship Karl Polanyi s economic sociology regulation studies and socio legal studies of transnational hazards The collection is distinct in that it links the study of specific transnational risk regulatory regimes back to a social theoretical discussion about economy society interactions informed by Polanyi s work Each of the chapters addresses the way in which economics as well as economic and social regulation can never be understood separately from the social particularly in the transnational context Endorsement This thought provoking collection asks the most critical question of our time how to civilise markets through social accountability and political action The climate and financial crises we face show how crucial this challenge is Lange Haines and Thomas have put together a series of fruitful case studies of the possibilities for embedding economic relationships in social relationships by a series of top class researchers within their own illuminating and sensitive framing of the issue Professor Christine Parker Professor of Regulatory Studies at Monash University
