Capon, 2012-12-06 Business and management education has an important impact on business practice throughout the world To a very large extent possession of the MBA degree is a passport into the upper reaches of management and CEOs of many major corporations have earned an MBA It is a reasonable inference that the education received by these leaders and managers during their MBA experience has an important impact on the way that businesses throughout the world are led and managed and that major corporate decisions are made The heart of the MBA education is the curriculum and curriculum design is perhaps the most important strategic function for a business school faculty to undertake In order to understand the many issues concerning this contemporary curriculum review this book examines three related contextual domains First it details the long term growth of business and management education Second it examines the major theoretical and empirical literatures on organizational evolution and decision making paying special attention to decision making in institutions of higher education Finally the book describes the previous major curriculum review at Columbia Business School in the late 1950s and the subsequent changes that formed the curriculum that was changed in 1992 This book demonstrates what can be achieved by an institution that sets high standards for its business education and assists faculty and administrators in other schools of business and management as they contemplate revision of their curricula In addition it provides a prime example of curriculum design effort in one of the leading institutions worldwide Finally it will be of interest to scholars in several different fields notably higher education curriculum review organizational decision making and long run organizational evolution
