**Catching Up and Leapfrogging** Xiao-Shan Yap, Rajah Rasiah, 2016-12-01 Ever since Schumpeter's groundbreaking work, there has been a plethora of new research seeking to extend the direction and dynamics of innovation. Using a rich account of detailed interviews, this book offers new evidence on how latecomers have successfully caught up and leapfrogged incumbent firms. Catching Up and Leapfrogging: the new latecomers in the integrated circuits industry explores how technological transitions affect latecomer catch up strategies and vice versa in a high technology industry. It looks to the East Asian latecomers who towards the end of the twentieth century pioneered a new

pathway through organizational change by specializing in the key production stages of integrated circuits and pushing technologies further. This volume assesses how latecomer resource acquisition strategies have varied alongside structural industry changes and evaluates the mechanisms through which firms started life as technology followers and rose to become technology leaders. Xiao Shan Yap and Rajah Rasiah present a unique story about how firm strategies evolve from the catching up phase to the leapfrogging phase captured from the accounts of managers on the ground. It is the first time firm level strategies have been systematically analysed to describe twenty first century strategic management in the integrated circuits industry in particular and the high tech industry in general. The evidence and analysis in this book offers insights for chief executive officers, policy makers and researchers to revisit existing approaches to the theory of catching up and leapfrogging.
