

## Floods and Flash Floods

**Age Range:** This unit has been designed specifically for students in grades 3-5. It can easily be adapted for younger or older students.

**Reading Level:** Depending on your state's teacher and student abilities and interests, have student groups complete each of the activities below or assign groups to work on specific activities and share their information.

### Vocabulary

water cycle flash flood flood floodplain drought dust storm hurricane hydrologist

Check The Weather Channel Education website's glossary's Daily/Season weather forecasts section for the meanings of these weather terms.

### Resources

For information on the science and safety of flooding, check out The Weather Channel's program on The Weather Channel. Check online at <http://www.weatherchannel.com> for program schedules and accompanying lesson plans and hands-on activities.

#### Weather Note:

in 1988 Hurricane Camille struck the Gulf Coast, but the storm system that followed brought rain and flooding all the way through Kentucky and Virginia.

### Science

**Purpose:** To have students investigate and demonstrate the science behind floods and flash floods.

1. Distribute "The Science of Floods and Flash Floods" Student Handouts, pages 1 and 2 to small groups of students. Have each follow the steps to demonstrate the science behind flooding. Encourage them to consider:
  - a. "What is flooding?"
  - b. "What are the characteristics of floods and flash floods?"
  - c. "Why are floods dangerous?"
2. Have groups research to find and develop other ways to demonstrate the science behind and the power of floods. Have them turn these demonstrations into lesson plans, complete with handouts for others in the class.

### Language Arts Extension:

People have tried many techniques to "tame" floods, including damming, digging irrigation channels, directing drainage patterns, filling in lowlands, and building dikes and canals. As technology improved, these projects grew larger, more sophisticated, and generally more efficient. Have students research methods of flood control/defense involving technologies.

- How has the technology changed?
- Which technologies worked/best better than others?
- What current technologies are used?
- What improvements and innovations are under research and development?

Will the Three Gorges Dam, which China built as a means to remove people from floods and to provide a source of water and energy for the people of Shanghai, hurt or harm the environment along the Yangtze River?
