A Guide to Teaching in the Active Learning Classroom Paul Baepler,J. D. Walker,D. Christopher Brooks,Kem Saichaie,Christina I. Petersen,2023-07-03 While Active Learning Classrooms or ALCs offer rich new environments for learning they present many new challenges to faculty because among other things they eliminate the room's central focal point and disrupt the conventional seating plan to which faculty and students have become accustomed The importance of learning how to use these classrooms well and to capitalize on their special features is paramount The potential they represent can be realized only when they facilitate improved learning outcomes and engage students in the learning process in a manner different from traditional classrooms and lecture halls This book provides an introduction to ALCs briefly covering their history and then synthesizing the research on these spaces to provide faculty with empirically based practical guidance on how to use these unfamiliar spaces effectively Among the questions this book addresses are How can instructors mitigate the apparent lack of

a central focal point in the space What types of learning activities work well in the ALCs and take advantage of the affordances of the room How can teachers address familiar classroom management challenges in these unfamiliar spaces If assessment and rapid feedback are critical in active learning how do they work in a room filled with circular tables and no central focus point How do instructors balance group learning with the needs of the larger class How can students be held accountable when many will necessarily have their backs facing the instructor How can instructors evaluate the effectiveness of their teaching in these spaces This book is intended for faculty preparing to teach in or already working in this new classroom environment for administrators planning to create ALCs or experimenting with provisionally designed rooms and for faculty developers helping teachers transition to using these new spaces *Handbook of Educational Reform Through Blended Learning* Ming Li,Xibin Han,Jiangang Cheng,2023-10-31 This open access book provides related theories methods strategies and practical cases for implementing education reform through blended learning in curriculum program and institutions in the digital age It sums up the research and practice achievements of blended learning from different research teams involving more than 20 experts from educational technology higher education vocational education and education management over the past 20 years This book recommends relevant policies of blended learning to international organizations and governments in various countries provides systematic solutions for administrators in institutions to promote educational reform via blended learning and serves as a reference book for instructors researchers and relevant enterprise practitioners Ab Initio Language Teaching in British Higher Education Ulrike Bavendiek,Silke Mentchen,Christian Mossmann,Dagmar Paulus,2022-12-01 Drawing extensively on the expertise of teachers of German in universities across the UK this volume offers an overview of recent trends new pedagogical approaches and practical guidance for teaching at beginners level in the higher education classroom At a time when entries for UK school exams in modern foreign languages are decreasing this book serves the urgent need for research and guidance on ab initio learning and teaching in HE Using the example of teaching German it offers theoretical reflections on teaching ab initio and practice oriented approaches that will be useful for teachers of both German and other languages in higher education The first chapters assess the role of ab initio provision within the wider context of modern languages departments and language centres They are followed by sections on teaching methods and innovative approaches in the ab initio classroom that include chapters on the use of music textbook evaluation the effective use of a flipped classroom and the contribution of language apps Finally the book focuses on the learner in the ab initio context and explores issues around autonomy and learner strengths The whole builds into a theoretically grounded guide that sketches out perspectives for teaching and learning ab initio languages that will benefit current and future generations of students
