It discusses some of the myths and controversies concerning these topics. It also analyzes the cognitive science research on how students learn and what educational practices best promote new learning. The second half of the book addresses how teachers can create and implement classroom practices that promote the principles of learning and convert dependent learners into independent ones. The book offers a holistic approach to teaching, focusing on classroom management and relationship building, writing and oral communication, lesson design, and assessment and feedback. It also examines how direct instruction methods can be used in conjunction with active learning strategies like project-based learning to improve student retention of knowledge and increase motivation and engagement.
