Guide to the Materials for American History, to 1783, in the Public Record Office of Great Britain ... Charles McLean Andrews, 1912

Preserving History Scott Monroe Waring, 2011-06-01 What and how to teach in the K 16 classroom history has been a perennial and at times heated debate Beginning as early as 1892 the question of what knowledge is of the most worth and what should be the central function of the history curriculum became a focus of many interested in education It was felt that the teachers needed to move away from traditional methods of teaching history such as rote memorization and the dry and lifeless system of instruction by textbook and find new and engaging ways to broaden and cultivate the mind Unfortunately these recommendations faced many critics and did not take hold in K 16 classrooms at this time or frankly at any point since then Even though we tend to have a nostalgic memory of earlier time periods and in turn the educational capabilities of the children from various times in our nation's past the results from multiple studies examining the historical knowledge base of America's youth has remained fairly discouraging Much of the lack of knowledge present stems from the manner in which history is traditionally taught Ineffective instructional methods greatly impact the interest levels or more frequently the distaste generated for learning about historical content and thus the public's corresponding perception of the importance of history within K 16 curricula This book makes an effort at overcoming the persistent boredom and lack of historical knowledge present in our students by focusing on ways in which history instruction can be improved
