Water Safety Plan Manual World Health Organization,2009 In 2004 the WHO Guidelines for Drinking Water Quality recommended that water suppliers develop and implement Water Safety Plans WSPs in order to systematically assess and manage risks Since this time governments and regulators water suppliers and practitioners have increasingly embraced this approach but they have also requested further guidance This much anticipated workbook answers this call by describing how to develop and implement a WSP in clear and practical terms Stepwise advice is provided through 11 learning modules each representing a key step in the WSP development and implementation process 1 Assemble the WSP team 2 Describe the water supply system 3 Identify hazards and hazardous events and assess the risks 4 Determine and validate control measures reassess and prioritise the risks 5 Develop implement and maintain an improvement upgrade plan 6 Define monitoring of the control measures 7 Verify the effectiveness of the WSP 8 Prepare management procedures 9 Develop supporting programmes 10 Plan and carry out periodic review of the WSP 11 Revise the WSP following an incident Every Module is divided into three sections Overview Examples and Tools and Case studies The overview section provides a brief introduction to the Module including why it is important and how it fits into the overall WSP development and implementation process It outlines key activities that should be carried out lists typical challenges that may be encountered and summarizes the essential outputs to be produced The examples and tools section provides resources which could be adapted to support the development and implementation of WSPs These resources include example tables and checklists template forms diagrams or practical tips to help a WSP team address specific challenges These are often example outputs and methodologies adapted

from recent WSP experiences Each Module concludes with case studies so the reader can benefit from lessons learned from real life experiences They are intended to make WSP concepts more concrete and to help readers anticipate issues and challenges that may arise The descriptions were drawn from WSP initiatives in Australia the Latin American and the Caribbean region LAC and the United Kingdom
