Floyd's acclaimed emphasis on applications using real devices and on troubleshooting gives users the problem solving experience they'll need in their professional careers. Known for its clear accurate explanations of theory supported by superior exercises and examples, this book's full color format is packed with the visual aids today's learners need to grasp often complex concepts.

KEY TOPICS The book features a comprehensive review of fundamental topics and a unique introduction to two popular programmable logic software packages Altera and Xilinx and boundary scan software.

MARKET For electronic technicians, system designers, engineers.

Applied Strength of Materials Leonard Spiegel, George F. Limbrunner, 1994. This practical introduction includes all of the coverage of strength topics contained in this larger text. It's a step by step presentation that is so well suited to undergraduate engineering technology students. Coverage includes belt friction, stress concentrations, Mohr's circle of stress, moment area theorems, centroids by integration and more.

Smart Healthcare for Disease Diagnosis and Prevention Sudip Paul, Dinesh Bhatia, 2020-01-14. Smart Healthcare for Disease Diagnosis and Prevention focuses on the advancement in healthcare technology to improve human health at all levels using smart technologies. It covers all necessary topics from basic concepts such as signal and image processing to advanced knowledge on topics such as tissue engineering, virtual and intelligent instrumentation or VLSI and Embedded Systems. This book can be used to guide students and young researchers providing basic knowledge on signal image processing and smart technologies. Users will find a perfect blend of the interdisciplinary approach to biomedical engineering. The book considers many technical concepts, emerging technologies, real world healthcare applications and many other technical multidisciplinary notions in the same content. Finally, it systemically introduces the technologies and devices for healthcare objects and targets disease diagnosis and prevention in different views. Discusses how new advanced technologies are used in real healthcare applications to improve patient safety. Explores how medical data such as signals and images can be used in diagnosis. Covers how wireless communications devices such as sensor networks, RFID, wireless body area network and wearable sensors are used in the medical environment.
