Miller,2017-03-01 Mainstream educational leadership has lost much of its footing as a progressive practice More managers than wisdom keepers educational leaders no longer have authority to critique the toxicities of the present and imagine alternative futures In public schools and higher education the neoliberal emphasis on measurable outcomes shrinks the radius of concern for what educational leaders are leading toward There s a planet missing in mainstream discourses of sustainability in educational leadership and this book aims to resituate the work of teaching leading in the place where we stand In a period of overlapping social environmental crises this book takes inspiration from Robert Jensen s call for teachers and intellectual leaders to go apocalyptic i e to face head on the calamities that threaten our shared future on Earth When leadership is situated within an apocalyptic context we are called to reflect on educational injustice and unsustainability while envisioning more hopeful futures The work of apocalyptic leadership though isn t all about future vision it s also about attending to what hurts and what heals in the present moment Intended for aspiring and practicing educational leaders in both K 12 and higher education settings as well as scholars in the fields of social justice and sustainability this book begins mapping and traversing the affective spiritual pragmatic and organizational geography of apocalyptic leadership Such leadership holds dear the radical belief in our shared capacity to work gracefully with the painful awareness that tremendous challenges are inevitable and yet we have every opportunity for inching toward a more habitable future **The Common**
