**Motherless Creations** Wendy C. Nielsen, 2022-05-30 This book explains the elimination of maternal characters in American British French and German literature before 1890 by examining motherless creations Pygmalion's statue Frankenstein's creature homunculi automata androids golems and steam men These beings typify what is now called artificial life living systems made through manufactured means Fantasies about creating life ex utero were built upon misconceptions about how life began sustaining pseudoscientific beliefs about the birthing body Physicians inventors and authors of literature imagined generating life without women to control the process of reproduction and generate perfect progeny Thus some speculative fiction before 1890 belongs to the literary genealogy of transhumanism the belief that technology will someday transform some humans into superior immortal beings Female motherless creations tend to operate as sexual companions Male ones often emerge as subaltern figures analogous to enslaved beings illustrating that reproductive rights inform readers' sense of who counts as human in fictions of artificial life

Words and Worlds , 2009-01-01 In this book the reader is invited to enter a strange world in which you can tell the age of the captain by counting the animals on his ship where runners do not get tired and where water gets hotter when you add it to other water It is the world of a curious genre known as word problems or story problems It originated in the ancient civilizations of Egypt China and India and is the subject of daily rituals among students and teachers in mathematics classrooms all around the world An international group of scholars with a shared interest in this phenomenon explore multiple aspects of this world from multiple perspectives These discussions take us deep into philosophical issues of the relationships between words mathematical systems and the physical and social worlds we all inhabit Empirical investigations are reported that throw light on how students and their teachers experience and interpret this activity raising profound questions about the nature and purposes of mathematics teaching learning in general and how it could be improved
