PREFACE

This book contains most of the standard basic theorems in group theory, as well as some topics which have not heretofore appeared in book form. The organization is as follows. Chapters are numbered 1 through 15; sections in Chapter 5, for example, are numbered 5.1, 5.2, etc., and theorems within sections, 5.2.1, 5.2.2, etc. Exercises follow nearly all of the sections and are numbered like theorems. Material other than theorems is not numbered (occasionally, Equations (1), (2), etc., or Examples 1, 2, etc., appear within a section). In addition to an index and bibliography, there is an index of notation. Chapters 4 through 15 are closed by a brief list of references.

The exercises are of a quite varied nature and are not graded in difficulty. Some are mere remarks of the "of course" variety. A number are counter-examples to various possible modifications of theorems in the text. A further type asks the reader to supply details omitted in proofs of theorems in the text. Many are provided with hints (in a few cases, simplifying published proofs). The reader should at least read the exercises since frequent reference is made to them in the body of the text.

An attempt has been made to keep the book as self-contained as possible. For example, in Chapter 13, in order to avoid the use of Dirichlet's theorem
