Finally, concerning a third, Barro's methodology may be problematic. In his paper, Barro (1997) uses a series of 1000 replications of the model to generate the distribution of the estimated parameters. This is done in order to account for the uncertainty in the estimates of the parameters. However, this method may be problematic because it does not take into account the uncertainty in the estimates of the parameters of the production function.

Employment in health care professions were also affected with people with severe disability to the professions or disability as barriers of the formal employment system with poor training systems and the lack of employment-related to aid.
