

Human Trafficking in the United States

Abstract

Human trafficking has evolved over ages but this vice remains to be fully combated. Historical records inform that slavery was pivotal in establishing various nations where people were trafficked from various countries and sailed to host nations for various exploitative reasons. In the US, slavery was fundamental in shaping the nation as it was a major contributor to the economy. The victims of slavery experience various forms of discrimination and oppression in the hands of the captors or owners.

In the modern world, slavery is common in the form of human trafficking where the purposes are mainly for labor and sexual exploitation. Globally, humans are trafficked from various countries to work in farms as well as serve as prostitutes in the host nations. In the US, human trafficking is prevalent and it exists in various forms. The offenders and the victims possess various characteristics that suit them to be part of the human trafficking business. However, the US has made various efforts and continues to put measures that seek to stop human trafficking

Introduction

Slavery in the US has been regarded as critical in the formation of this country. It has played a major role in advancing the economy but the victims suffered in return. Modern slavery is apparent in human trafficking where victims are exploited for labor and sexual purposes. In the US, human trafficking embodies the purposes for exploiting illegal migrants in farms as well as in commercial sex industries. Globally, human trafficking involves the transportation of humans from their home country to overseas nations either in pursuit of perceived better living or as a result of forced transportation. This study seeks to investigate what modern-day slavery as well as provide ways in which it has been combated.

Historical and Modern-Day Slavery

Slavery is well-known that has shaped many nations around the globe. In particular, the US has been well documented in reference to slavery from the early years of America as a nation up to the abolition of slavery in 1865. In the US, the South played a critical role in promoting slavery since the farming of cotton depended on slaves. In particular, the farm owners in this region needed slaves for growing cotton to keep up with the region as the global needs of this crop (Wharton, 2010).

The North was also complicit in slavery since it depended on the cotton grown in the South to manufacture textile to export to other nations (Wharton, 2010). However, slave labor in the US has had a significant change to develop into the slavery that came to be known worldwide.

Forced labor first existed as contracted servitude where the employers would contract this labor for a period of years and the labors were regarded as property to the extent of being passed down to the next generations in form of will (Wharton, 2010). This type of forced labor was transformed into slave labor from which

unleashing a reign of terror against the power elites the young leader seems to be seeking to present himself to ordinary citizens as a leader who loves the people Nonetheless the very fact that these measures are possible shows his policies and instructions have supra legal authority in North Korea A typical infringement on freedom of residence the practice of forced deportation is still found to be widespread North Korean defector XXX testified that in 2013 during his on site instructions in Musan Kim Jong un ordered transformation of the city boundaries into an exemplary area This led to the forced deportation of more than 600 households living within 300 meters of the city boundaries Such massive involuntary relocation was enforced primarily upon family members of illegal border crossers or those with criminal records such as illegal use of a mobile phone A number of testimonies also suggested that forced deportation has been on the increase since mid 2013 in Samjiyon County within which is the hometown of Kim Jong il In particular those whose parents are from rural areas former detainees at ordinary prison camps kyohwaso and their family members and illegal border crossers are first to be relocated According to the 2014 survey results little progress has been made in improving North Koreans rights to food and health When it comes to the right to food the total volume of food available has increased since 2010 but North Korea s discriminatory distribution policies has led to continued discrepancy among ordinary citizens in their access to food Collection of excessive amounts of produce from farm workers in particular has undermined their right to food on a continuous basis This seems partly attributable to the assignment of unrealistically high production quota and the falsification of distribution documents Excluded from the Public Distribution System PDS marginalized members of North Korean society tap into money offered by loan sharks to deal with the scarcity ending up suffering even more In the 2014 survey however a large number of interviewees said the public distribution supply has temporarily improved since 2012 as North Korean authorities released military provisions As for the right to health the uneven distribution of resources as a result of economic hardship and military first politics has destroyed the medical system as a whole The absolute lack of medicine and basic medical equipment has continued while some interviewees pointed out in the 2014 survey that an increasing amount of medicine was being provided by Jungsung Pharmaceuticals Meanwhile as the North s free treatment system is not working properly patients in need of surgery often end up paying for the related costs for themselves The military ranks are also seeing their right to health deteriorating Some interviewees stated that the military was also short on medicine and not just civil society The community doctor system and other mechanisms of preventive medicine propagandized by the North Korean authorities are not functioning properly Community doctors are currently incapable of treating patients and can only issue medical certificates they are known to work primarily on vaccinations such as preventive injections against epidemics A large number of interviewees in the 2014 survey said that vaccination was being offered Vaccination seems to be improving efforts to prevent disease Areas receiving aid from the UN and other international actors also enjoy relatively better medical treatment Despite many constraints and the resulting shortcomings we hope that this
