Disruptive Artificial Intelligence and Sustainable Human Resource Management

Anamika Pandey, Balamurugan Balusamy, Naveen Chilamkurti, 2023-12-14 It is well established that every organization is founded with a specific purpose and goals Virtually all business organizations obtain measurements and metrics dealing with outcomes and results However what is reflected on the balance sheet does not necessarily show the actual worth of the organizations and ensure their survival and sustainability Thus the question arises what exactly makes the organizations sustainable and thriving in an ever changing environment There are several examples of companies like Faber Castell Bank of Ireland Chivas DuPont and many more which have been able to sustain and survive over more than 200 years and still have a successful existence in the present era Thus it is important for the organization to pay equal attention to its three bottom lines i.e. people profit and planet for its sustainability which not only meet the needs of the present generation but should have a futuristic approach as well In the present era organizations are adopting a new normal working dynamic and coping with the post

pandemic situations to sustain themselves in the business environment Technology plays a significant role in this new working dynamic and cutting edge technologies like machine learning artificial intelligence blockchain ChatGPT Internet of Things and much more effectively facilitate human functioning at work The book aims to contribute to understanding and developing sustainable human resource management processes and practices aligned with recent technologies It highlights the interconnection among the three bottom line sustainable approaches for the growth and development of the organization Topics discussed in this book include Disruptive Technologies and HR Sustainability Convergence of Innovative Technologies HR and Organizational Growth Triple bottom line Sustainability for HRM Business oriented Talent analytics and HR Sustainability Role of Leadership in sustainable HRM practices A Global Guide to Human Resource Management Thomas Klikauer,2022-06-17 A Global Guide to Human Resource Management is a concise HRM introductory text offering a uniquely non region specific approach to people management in international business organisations The book presents an alternative to standard managerial approaches reflecting the perspectives of multiple stakeholders workers trade unions states and governments NGOs to critically evaluate HRM in practice and in so doing enables students to make effective decisions in their own practice wherever their careers take them Its accessibility and concision make it well suited to short courses for non HRM and non business specialists This text covers all major introductory topics for non specialists introducing the concept and purpose of HRM through recruitment people skills designing work promoting health rewarding success and successful and ethical people management This edition includes a new chapter on green HRM Rich with pedagogical features the book includes five case studies per chapter to connect theory with practice It is also supported with a range of instructor materials including online guest lectures general discussion questions a glossary an index and online documentaries that explain how to manage people It is essential reading for students interested in Human Resources and Personnel Management Organisational Behaviour and Development and Workplace Culture Human Resource Management in an Emerging South Asian Economy Tamer K. Darwish,Pengiran Muda Abdul Fattaah,2020-01-22 This book focuses on human resource management HRM in the country context of Brunei Darussalam analysing comparing and contrasting domestic enterprises DEs with multinational enterprises MNEs and oil and gas with non oil and gas sectors and draws out the comparative lessons for understanding the potential and performance consequences of HR interventions in resource centred national economies Work carried out more recently drawing a contrast between Asian capitalisms has established a number of important defining aspects inherent in economies in Asia this helps to present approaches to establishing the way in which Brunei may be seen to be aligned with and depart from other business systems and frameworks in Asia The existing literature highlights a trend towards focusing on the Asian context however most studies have focused on specific Asian countries and research conducted in other contexts remains scarce As the region gains economic prosperity it is increasingly important to conduct some work that will be able to highlight the relevant HRM system s for other Asian contexts Although some emerging Asian

economies are still quite far from achieving developed nation status it is however essential to understand the HRM systems prevalent in such economies as they can contribute greatly to the economic development there Hence this book highlights the importance of viewing the development and nature of HR in Brunei and locates the practice of HRM within the wider economic and political context and draws out the theoretical and practical implications for understanding continuity in change in HR practice and similarities with and differences from other emerging markets It will be of interest to researchers academics and students in international and comparative human resource management *Handbook of Research on Comparative Human Resource Management* Chris Brewster, Wolfgang Mayrhofer, Elaine Farndale, 2018-04-27 This second updated and extended edition of the Handbook of Research on Comparative Human Resource Management draws on the work of many of the world's leading researchers in the field to present the state of the art to scholars students and practitioners The Handbook provides a detailed focus on the theoretical underpinnings of Comparative HRM on comparative studies of specific areas of HRM practice and on the unique features of HRM in all the main regions of the world
