2.1 Read the passage below and answer the questions that follow.

Peat lands are special wetlands that play a very important role in ecology. A peat land, of approximately 5 000 years old, near Mufang is almost destroyed because of excessive extraction of water from the nearby Malipo river. The water is extracted for human consumption.

Peat lands like the one near Malling is exceptional and play an important role in storing water as well as preventing climate changes.

Dr. Paul-Louis Dranding said that carbon that is "held" or "stored" by peat lands combats climate change because it decreases the amount of carbon in the atmosphere.

Peat lands trap about one third of the world's carbon. Approximately 60% of wetlands worldwide are peat lands. However in South Africa about 10% of the wetlands are peat lands.

Grundling explained that peat lands can hold about 1 000 times its own mass in water. This replenishes the water table and is the source that keeps streams flowing. The "sponge effect" of the peat also makes it possible to store water that is then released during the seasons.

Dr. Grunwald said that it might be too late to restore the peat land near Malling, but it might be possible to restore some parts of it if more water is supplied to this peat land.

The result of this destruction is depletion of the water table. The habitat of numerous fish and bird species that lived in the canal bed was also destroyed.

Management Consultancy and the British State Antonio E. Weiss, 2018-10-26 This book traces the emergence and development of the relationship between management consultancies and the British state It seeks to answer three questions why were management consultants brought into the machinery of the state how has state power been impacted by bringing profit seeking actors into the machinery of the state and how has the nature of management consultancy changed over time The book demonstrates the role consultants played in major developments in the postwar period Specific case studies interrogate how consultancies influenced the policy fields of health service reform and social security benefits This book will redefine debates amongst business historians and historians of the postwar British state about the nature of management consultancy and public sector reform *On Creation, Science, Disenchantment and the Contours of Being and Knowing*

Matthew W. Knotts, 2019-09-19 For Augustine the world is replete with meaning it represents not merely a collection of facts to be catalogued but a repository of truths to be discovered and discerned a view which contrasts with the one we have inherited as a result of the thought of figures such as Descartes Newton and Kant What difference would it make to see the world as created Matthew W Knotts explores this question in close conversation with Augustine according to whom our nature as God's creatures determines fundamental aspects of our identity and our knowledge In a postmodern context informed by a renewed appreciation of the limitations of human nature and reason Augustine once again emerges as an insightful and compelling source for further reflection *Is There Purpose in Biology?* Denis Alexander, 2018-06-22 Atheists

assert that the natural world has no meaning or purpose Dr Denis Alexander Emeritus Director of The Faraday Institute for Science and Religion at St Edmunds College Cambridge draws a different conclusion Not only do recent evolutionary biological data appear inconsistent with the claim that the world is purposeless but the Christian doctrine of creation has provided and continues to provide both context and stimulus for the study of the natural world Christians started biology However is a belief in an omnipotent benign Creator consistent with a world of pain and suffering From a lifetime s study in the biological sciences Denis Alexander believes that whilst the cost of existence is extremely high it can nonetheless be squared with the idea of a God of love whose ultimate purposes for humankind render that cost more comprehensible

Pakistan's National Security Approach and Post-Cold War Security Arshad Ali,2021-03-31 This book analyzes the paradox that despite being a national security state Pakistan has become even more insecure in the post Cold War era It provides an in depth analysis of Pakistan s foreign and security policies and their implications for the overall state and society The book identifies the immediate security challenges to Pakistan and charts the distinctive evolution of Pakistan s national security state in which the military elite became the dominant actor in the political sphere of government during and after the Cold War period By examining the national security state militarization democracy and security proxy wars and the hyper military industrial complex the author illustrates how the vanguard role of the military created considerable structural sociopolitical economic and security problems in Pakistan Furthermore the author argues that the mismatch between Pakistan s national security stance and the transformed security environment has been facilitated and sustained by the embedded interests of the country s military industrial complex A critical evaluation of the role of the military in the political affairs of the government and how it has created structural problems for Pakistan this book will be of interest to academics in the field of South Asian Politics and Security South Asian Foreign and Security Policy International Relations Asian Security and Cold War Studies

The Puritan Ideology of Mobility Scott McDermott,2022-02 The Puritan Ideology of Mobility Corporatism the Politics of Place and the Founding of New England Towns before 1650 examines the ideology that English Puritans developed to justify migration their migration from England to New England migrations from one town to another within New England and often their repatriation to the mother country Puritan leaders believed firmly that nations colonies and towns were all bodies politic that is living and organic social bodies However if a social body became distempered because of scarce resources or political or religious discord it became necessary to create a new social body from the old in order to restore balance and harmony The new social body was articulated through the social ritual of land distribution according to Aristotelian distributive justice The book will trace this process at work in the founding of Ipswich and its satellite town in Massachusetts *Publishers' Circular and Booksellers' Record of British and Foreign Literature* ,1916
