The Regulation of Megabanks Katarzyna Parchimowicz, 2022-11-22 Global systemically important banks G-SIBs are the largest most complex and in the event of their potential failure most threatening banking institutions in the world The Global Financial Crisis GFC was a turning point for G-SIBs many of which contributed to the outbreak and severity of this downturn The unfolding of the GFC also revealed flaws and omissions in the legal framework

applying to financial entities In the context of G SIBs it clearly demonstrated that the legal regimes both in the USA and in the EU grossly ignored the specific character of these institutions and their systemic importance complexity and individualism As a result of this omission these megabanks were long treated like any other smaller banking institutions Since the GFC legal systems have changed a lot on both sides of the Atlantic and global and national lawmakers have adopted new rules applying specifically to G SIBs to reduce their threat to financial stability This book explores whether the G SIB specific regulatory frameworks are adequately tailored to their individualism in order to prevent them from exploiting overly general rules as they did during the GFC Analyzing the specific character and individualism of G SIBs in relation to their history normal functioning as well as their operations during the GFC this book discusses transformation of banking systems and the challenges and opportunities G SIBs face such as Big Tech competitors climate related requirements and the COVID 19 pandemic Taking a multidisciplinary approach which combines financial aspects of operations of G SIBs and legal analysis the book describes G SIB oriented legal frameworks of the EU and the USA and assesses whether G SIB individualism is adequately reflected analyzing trends in supervisory action when it comes to discretion in the G SIB context all in order to contribute to the ongoing discussions about international banking law its problems and potential remedies to such persistent flaws

Unforgettable W. Michael Gray, 2016-10-12 We have an uneasy relationship with the relentless deluge of information gushing out of academia and our media outlets To turn it off is escapist but to attempt to cognitively grapple with it is overwhelming In **Unforgettable** Enabling Deep and Durable Learning a nationally recognized master teacher gives professors and their students the means to chart a clear path through this information explosion Humans crave explanatory patterns and this book enables teachers to think deeply about their academic disciplines to find and articulate their core explanatory principles and to engage their students in a compelling way of thinking An alternative title for this book could be **Why the Best College Teachers Do What They Do** because the author articulates a compelling rationale that will equip faculty to create and deliver transformative courses Students in transformative courses grapple with essential questions and gain mental muscle that equips them for real world challenges

The Inequality Trap William Watson, 2015-01-01 Argues that focusing on inequality is an error because much inequality is good the reward for thrift industry and invention and also a trap because it leads us to fixate on the top end of the income distribution rather than on those at the bottom who need help most Asserts that responding to growing inequality by fighting capitalism rather than poverty may lead to both more poverty and less equality

Unexpected Alison Piepmeier, 2021-02-23 What prenatal tests and down syndrome reveal about our reproductive choices When Alison Piepmeier scholar of feminism and disability studies and mother of Maybelle an eight year old girl with Down syndrome died of cancer in August 2016 she left behind an important unfinished manuscript about motherhood prenatal testing and disability In **Unexpected** George Estreich and Rachel Adams pick up where she left off honoring the important research of their friend and colleague as well as adding new

Social Media and the Good Life Mark Y. Herring, 2015-06-29 Social media have accelerated communication expanded business horizons and connected millions of individuals who otherwise would never have met But not everything social media touch turns to gold much of it is brass Social networking sites are used by scammers criminals and sexual predators and many people now self diagnose illness based on misinformation shared online Businesses make great claims about social media as a marketing tool but few show any real returns We communicate through social media but are we really saying anything Is social media doomed to be a conduit of narcissism or can it become a channel for responsible communication Can social networking overcome its manifold violations of privacy Must we sacrifice our identities in order to tweet or friend our associates This book examines some of the legal and ethical issues surrounding social media their impact on civil discourse and their role in suicides murders and criminal enterprise

The Oxford Handbook of Assessment Policy and Practice in Music Education, Volume 1 Timothy S. Brophy, 2019-01-02 In the music classroom instructors who hope to receive aid are required to provide data on their classroom programs Due to the lack of reliable valid large scale assessments of student achievement in music however music educators in schools that accept funds face a considerable challenge in finding a way to measure student learning in their classrooms From Australia to Taiwan to the Netherlands music teachers experience similar struggles in the quest for a definitive assessment resource that can be used by both music educators and researchers In this two volume Handbook contributors from across the globe come together to provide an authority on the assessment measurement and evaluation of student learning in music The Handbook s first volume emphasizes international and theoretical perspectives on music education assessment in the major world regions This volume also looks at technical aspects of measurement in music and outlines situations where theoretical foundations can be applied to the development of tests in music The Handbook s second volume offers a series of practical and US focused approaches to music education assessment Chapters address assessment in different types of US classrooms how to assess specific skills or requirements and how assessment can be used in tertiary and music teacher education classrooms Together both volumes of The Oxford Handbook of Assessment in Music Education pave the way forward for music educators and researchers in the field

The Ascent of Information Caleb Scharf, 2021-06-15 Full of fascinating insights drawn from an impressive range of disciplines The Ascent of Information casts the familiar and the foreign in a dramatic new light Brian Greene author of The Elegant Universe

Your information has a life of its own and it's using you to get what it wants One of the most peculiar and possibly unique features of humans is the vast amount of information we carry outside our biological selves But in our rush to build the infrastructure for the 20 quintillion bits we create every day we've failed to ask exactly why we're expending ever increasing amounts of energy resources and human effort to maintain all this data Drawing on deep ideas and frontier thinking in evolutionary biology computer science information theory and astrobiology Caleb Scharf argues that information is in a very real sense alive All the data we create all of our emails tweets selfies AI generated text and funny cat videos amounts to an aggregate lifeform It has goals and needs It can control our behavior and influence our well being And it's an organism that has evolved right alongside us This symbiotic relationship with information offers a startling new lens for looking at the world Data isn't just something we produce it's the reason we exist This powerful idea has the potential to upend the way we think about our technology our role as humans and the fundamental nature of life The Ascent of Information offers a humbling vision of a universe built of and for information Scharf explores how our relationship with data will affect our ongoing evolution as a species Understanding this relationship will be crucial to preventing our data from becoming more of a burden than an asset and to preserving the possibility of a human future

Sick Architecture Beatriz Colomina, 2025-10-21 A thought provoking essay collection about how architecture and sickness are surprisingly interwoven from Ancient Greece to present day New York City Illnesses wellness and architecture are inseparable Medical professionals and architects have always been in a kind of dance often influencing one another though the dance is not always synchronized Drawing from a wide range of historical and contemporary case studies from ancient Greece to twentieth century India to present day New York City Sick Architecture highlights a topic that has shaped our lives from the very beginnings of architecture to the outbreak of the Covid 19 pandemic and beyond Sick Architecture goes beyond the sicknesses recognized by the medical profession to ask What aspects of society may be ill in need of care or subject to pathologization Similarly the book goes beyond physical buildings and cities to interrogate architecture's policy protocols and spatial logics Its thirty five diverse essays explore moments in global history when shifting notions of health became vectors for the development of architectural practice and discourse as well as the reverse when architecture acted as a reservoir and vector for illness
