Dellino,2012-12-06 The first edition of Cold and Chilled Storage Technology was prepared at a time when great changes were taking place in the industry that were hard to put into clear perspective For example the CFClozone layer problem was identified the Montreal Protocol was signed and experts from many disci plines were already proposing solutions to the problems seen at the time Not only were there the usual differences in approach to the problems there were different understandings of the problems themselves For in stance some authoritative voices were saying HCFC 22 was part of the solution not part of the problem and recommending it as the main refrig erant for the future others said the opposite As editor I have taken the view that this should be a reference book and as such it should contain information that points in the direction of tried and proven good practice To avoid the risk of misdirecting readers I decided that the CFC issue was too unclear to be usefully discussed in the first edition and left it out altogether This was the main criticism of the first edition at the time of its publication but in view of the developments since then I stand by my decision to avoid premature comment in that instance The matter is discussed in this edition in Chapters 4 and 7 which include summaries of other related factors in a way that was certainly not possible in 1989      **Airport Baggage Handling Systems** Brahim Rekiek,2023-10-19 The competition between airports demands higher quality services to satisfy passengers A Baggage Handling System BHS serves functions such as baggage sorting screening and storage A successful BHS means bags move between areas as travellers do Handlers load unload bags and transfer them between the airport s areas Automation can save money and bring safety and
