Moral Entanglements Stefan Bargheer, 2018-04-05 At the center of Stefan Bargheer's account of bird watching field ornithology and nature conservation in Britain and Germany stands the question of how values change over time and how individuals develop moral commitments Using life history data derived from written narratives and oral histories Moral Entanglements follows the development of conservation from the point in time at which the greatest declines in bird life took place to the current efforts in large scale biodiversity conservation and environmental policy within the European Union While often depicted as the outcome of an environmental revolution that has taken place since the 1960s Bargheer demonstrates to the contrary that the relevant practices and institutions that shape contemporary conservation have evolved gradually since the early nineteenth century Moral Entanglements further shows that the practices and institutions in which bird conservation is entangled differ between the two countries In Britain birds derived their meaning in the context of the game of bird watching as a leisure activity Here birds are now as then the most popular and best protected taxonomic group of wildlife due to their particularly suitable status as toys in a collecting game turning nature into a playground In Germany by contrast birds were initially part of the world of work They were protected as useful economic tools rendering services of ecological pest control in a system of agricultural production modeled after the factory shop floor Based on this extensive analysis Bargheer formulates a sociology of morality informed by a pragmatist theory of value

U.S. Forest Service Research Note United States. Rocky Mountain Forest and Range Experiment Stations, Fort Collins, Colo,1994 Bird Conservation David R. Williams,Robert G. Pople,David A. Showler,Lynn V. Dicks,Matthew F. Child,Erasmus K.H.J. zu Ermgassen,William J. Sutherland,2013-03-01 This book brings together scientific evidence and experience relevant to the practical conservation of wild birds The authors worked with an international group of bird experts and conservationists to develop a global list of interventions that could benefit wild birds For each intervention the book summarises studies captured by the Conservation Evidence project where that intervention has been tested and its effects on birds quantified The result is a thorough guide to what is known or not known about the effectiveness of bird conservation actions throughout the world The preparation of this synopsis was funded by the Natural Environment Research Council and Arcadia Bird-lore ,1907 **Kaniksu National Forest (N.F.), Lamb-Upper West Branch Unit Land Use Plan (WA,ID)** ,1976 **CRC Handbook of Census Methods for Terrestrial Vertebrates** David E Davis,2021-05-30 Learn how to start a census program for terrestrial vertebrates with this handbook Whether the information you need is for managing a population surveying environmental impact or conducting research on a particular species this handbook has it all Principles methods and calculations are explained The following information is given for each species name range reasons for census life history items of importance e g migration methods of census recent and pertinent references and comments about the various methods *Urban Bird Ecology and Conservation* Christopher A. Lepczyk,Paige S. Warren,2012-10-26 Now that more than half of the world s population lives in cities the study of birds in urban ecosystems has emerged at the forefront of ornithological research An international team of leading researchers in urban bird ecology and conservation from across Europe and North America presents the state of this diverse field addressing classic questions while proposing new directions for further study Areas of particular focus include the processes underlying patterns of species shifts along urban rural gradients the demography of urban birds and the role of citizen science and human avian interaction in urban areas This important reference fills a crucial need for scientists planners and managers of urban spaces and all those interested in the study and conservation of birds in the world s expanding metropolises Guide to the Systematic Use of the North American Bird and Nature Study Harold Brough Shinn,Gerard Alan Abbott,1912 **Key Determinants of Biodiversity, Ecosystem Functioning and Restoration in Climate Change Sensitive Ecosystems** Hui Zhang,Xiang Liu,Robert John,2023-11-27 Human activities such as agriculture and mining have led to serious negative effects on biodiversity and important ecosystem services including biodiversity loss and climate change Thus it is important

to quantify the key determinants of biodiversity ecosystem functioning and ecological restoration of degraded plant communities in climate change sensitive ecosystems i.e. subalpine and alpine meadow communities in Qinghai tropical rainforests and tropical mountains In this way effective management policy and methods can be developed to reduce the influence of climate change on these climate change sensitive ecosystems The aforementioned human activities continue to destroy and degrade plant communities and ecosystem functioning Climatic changes further exacerbate negative impacts and may trigger rapid loss of species precipitate decline and changes in the flows of ecosystem goods and services As the collective anthropogenic influence intensifies some ecosystems may be more sensitive than others to these changes Ecosystems that contribute greatly to human well being through the delivery of biodiversity and ecosystem benefits should be the focus of particular concern There are key knowledge gaps on the specific nature of anthropogenic impacts species and ecosystem responses and possible management and mitigation measures Comprehensive documentation of these aspects from highly sensitive regions and ecosystems is urgently needed particularly at fine scales which is relevant for developing management and mitigation measures Pathways such as ecological restoration can offset some of the impacts but even quantifying the impacts of observed and anticipated changes is far from adequate and other mitigation measures must be considered

Raptor Research and Management Techniques Keith L. Bildstein, David Michael Bird, 2007 Think about how we know about past events in human history e.g. the expansion of the Roman Empire or the American Revolution What types of records document those events Now think about Earth's history specifically the past environmental or climatic conditions at times before recorded human history What records might there be of such conditions Make a list of your ideas

an assemblage of five major types of natural archives of Earth's environmental and climatic history What common features do each of these paleoclimate archives share an assemblage of 5 major types of natural records or archives of Earth's environmental and climatic history Just like a diary or other historical document the layers in these natural archives contain indirect evidence i.e. proxies about past conditions and events recorded in a sequential order The evidence is specific to a certain time period and may be general or very detailed depending on the rate that information was recorded The faster the rate at which the recorder grew trees and corals accumulated snow and ice or was deposited sedimentary sequences the more detailed the record is and the higher its resolution For example a record in which an annual signal can be observed has a very high resolution In contrast if the finest observable details are on the order of a million years then that record would have a low resolution
