Mies Van Der Rohe A Critical Biography:

Mies Van Der Rohe Franz Schulze, Mies van der Rohe Archive, 1985 Critical biography of one of the twentieth centuries most illustrious architects

Mies Van Der Rohe Archive, Part 2, 1938-1969 Franz Schultz, 1999-01-01 Franz Schulze's acclaimed biography is a captivating story of the life designs and ideas that made Mies van der Rohe one of the world's most celebrated modern architects. The most comprehensive book ever written about the master designer and by any measure the best. This is a genuinely readable book. Because no writer has ever before probed into Mies's life at such depth we have here the first definitive reconstruction of the architect's personal habits, loves, fears, triumphs, loneliness, and in his old age, agonies. Paul Gapp Chicago Tribune A herculean, generally successful effort to present Mies's work in terms of both character and context. The substance is impressive and much of the material is fresh and revealing. This book has obviously been a long labor of love and respect for which no source has been left untouched. Ada Louise Huxtable New York Times Book Review Schulze's excellent book is absolutely worthy of its subject. Soundly researched, vividly detailed, and hard to fault, critically it is the most complete survey ever written of Mies's life and works. No one else has approached Schulze's achievement in telling the whole story over eight decades. Allan Temko San Francisco Chronicle Review Schulze has both the gift of an architectural historian able to render Mies's building innovations and that of a biographer able to paint the humanity and shortcomings of the man. Jane Holtz Kay Christian Science Monitor By its broad scope, its eloquent style, and above all its prodigious scholarship, this book clearly establishes itself as an indispensable volume for the library of the serious Mies scholar. Louis Roach Journal of the Society of Architectural Historians In Schulze's hands, Mies is no longer the impassive monolith he has sometimes seemed to be, but a complex human being whose varying moods reflected and affected the vicissitudes of his life and work. Yet in this model architectural biography, Schulze also knows and brilliantly demonstrates the integral nexus of architecture and life. Thomas S. Hines Progressive Architecture Franz Schulze's Mies van der Rohe: A Critical Biography captivates from the very first paragraph. The writer is a skillful storyteller. In his hands, Mies's life acquires the intensity and dramatic progression of a novel. Juan Pablo Bonta Design Book Review A revelation. The man who emerges from its pages is not cold and rational but exuberant and illogical. Donald Davis Newsweek A readable, well-researched, and sympathetic biography. Mark Girouard Washington Post Book World The standard life of Mies for some time to come. William H. Jordy The New Criterion A distinguished and eloquent biography. Paul Goldberger New York Times A magnificent biography. Diana Ketcham The Oakland Tribune

spirituality by some of the avant garde in defiance of Sachlichkeit and the machine aesthetic the volume also considers the many varied appropriations of sacrality that architects have made up to the present day and also in social and cultural contexts beyond the West

Finishing in Architecture Paul Emmons, Marcia Feuerstein, Negar Goljan, 2025-06-30

Finishing in Architecture Polishing Completing Ending explores the topic of finishing and the fascinating physical and metaphysical implications of its various conceptions in architecture Finishing is essential to all human practices and concepts of time yet simultaneously it is largely impossible to identify an entirely finished state of being As mortals we organize our worlds into beginnings and endings starts and finishes Architecture's temporality however may contain something of both the mortal and immortal within it a desire for permanence combined with lamentation over its impossibility While many approaches to finishing construct two opposed ontological conditions the finished and the unfinished this dualistic ploy neglects the complexity of architectural practice cultural reception and historiographic shifts in semiotics during the lifetime of a building More nuanced approaches are examined in this collection of 38 essays and creative works from a diverse group of scholars architects and artists who conceptualize finishing not simply as a final outcome but as an extended action a mood that presumes an end is near all the while working continuously toward but never achieving completion It is here that the concept of finishing is not a state of being but a state of becoming as an active thickening of time when the end is thought to be imminent but not yet attained Finishing more than a final endpoint is a void state that is extended through efforts framing its territory while never quite containing it From the material to the procedural and the conceptual this volume explores the practices of finishing in architecture within three currents surfaces projects and most broadly architectural times It will be of interest to students and instructors of architecture and design architectural historians and other scholars

The Bauhaus and America Margret Kentgens-Craig, 2001 After the Bauhaus's closing in 1933 many of its protagonists moved to the United States where their acceptance had to be cultivated In this book Margret Kentgens-Craig shows that the fame of the Bauhaus in America was the result not only of the inherent qualities of its concepts and products but also of a unique congruence of cultural supply and demand of a consistent flow of information and of fine-tuned marketing Thus the history of the American reception of the Bauhaus in the 1920s and 1930s foreshadows the patterns of fame making that became typical of the post World War II art world
