Planning for Power Advertising Anand Halve, 2005-11-05 This book is a sound and comprehensive introduction to advertising planning and branding. Intended for students of and beginners in advertising and marketing, it discusses key issues and market realities many of which are ignored and neglected in developing markets. The structure of this book follows a stepwise process which starts from the beginning of the advertising planning process to the end product which is the creative brief. Each chapter discusses a conceptual principle which is illustrated by relevant examples. Some key issues discussed in this book are planning for communication in a context, Segmentation, studying and understanding the dimensions, demographics and psychographics of the target group, Differentiators and Motivators, discovering what can change the consumers' mind, managing a brand over time, looking at the entire life cycle of a brand. Each chapter ends with an Action Point which helps the reader to apply the principles discussed through an exercise. **Bookbuyers' Reference Book**, 1993

Dave Chaffey, Co-founder and Content Director, Smart Insights. This book has the strongest focus of online and offline integration of any marketing communications textbook. A blended approach to marketing is in its DNA. Compared to the competition that too often uses a bolt-on approach to integration, this book is essential for giving students the precise skills employers will look for to be able to implement genuinely integrated marketing campaigns. This new seventh edition combines professional and academic expertise to ground big picture theory into real world case studies, drawing from cutting edge global companies like Snapchat and Spotify that will teach students the why behind the how. With increased focus on social media and the latest digital technologies, this new edition will teach students how AI, the Internet of Things, Big Data, AR, VR, and marketing automation can be used successfully in campaigns. The opportunity and risks of social media, how to navigate ethical and data management challenges, how to use the current preferred digital marketing tools and technology. Covering the key themes of customer engagement, experience, and journey, this book will allow students to become truly confident working in an environment of ongoing technological transformation.
