Financial Management Jim McMenamin, 2002-09-11 Finance is a notoriously difficult core subject for business undergraduates which many find difficult to understand. The area has been dominated by large and complex introductory texts often from the US which many lecturers find too detailed and unwieldy. This carefully developed and researched text will fill this gap by providing a succinct modular UK focused introduction to the subject of financial management. Quality controlled by an academic review panel, the content and approach has been rigorously developed to answer the needs of non-finance students. The user-friendly features and design will be of great appeal to the many undergraduates who find finance a difficult subject. Examples, models, formulas and exercises are lucidly and clearly presented, supported by strong pedagogical features, learning objectives, worked examples, key learning points, further reading, practical assignments, references, case studies and teacher's guide. This ensures that Financial Management will prove the most accessible text for business and finance students.

*Financial Management Systems* Kay L. Daly, 2009-12 In March 2004 the Office of Management and Budget (OMB) launched the financial management line of business (FMLOB) initiative in part to reduce the cost and improve the quality and performance of federal financial management systems by leveraging shared service solutions and implementing other reforms. In March 2006 it was reported that OMB's approach did not fully integrate certain fundamental system implementation-related concepts and recommended OMB take specific actions. This report discusses 1) OMB's progress in addressing prior FMLOB recommendations and implementation challenges and 2) the effectiveness of OMB's monitoring of financial management system modernization projects and their costs. Includes recommendations. Illustrations.
