Fire Service Inspectorate, 2007-03-07 Incidents involving rescue from road vehicles are dramatically increasing in frequency There are some 3500 deaths on the road each year with 35 000 serious injuries Modern motor vehicles are becoming safer for occupants due to advancement in technology so persons are more likely to survive high impact speeds but are also more likely to become entrapped The Fire and Rescue Service as the primary rescue service requires national guidance to ensure a similar standard of response anywhere in the UK This manual is designed to highlight current best practice with regard to vehicle rescue techniques and first responder trauma care Each chapter forms an independent reference source but the publication as a whole forms a complete guide Chapters cover vehicle design and construction dealing with incidents safety procedures operational procedures extrication equipment medical considerations and trauma care Integrated Personal Development System I P D S Appendices cover Highways Agency Fire and Rescue Service memorandum of understanding training and general information and emergency services personnel ESP aide mmoire The CD ROM Vehicle extrication techniques is a multi media guide to rescue tool handling and extrication techniques Fire and Rescue Service operational guidance - incidents in tunnels and underground structures Great Britain: Department for Communities and Local Government, Chief Fire & Rescue Adviser, 2012-04-27 This publication presents a framework for a safe system of work for operations at incidents involving tunnels and underground structures It provides a robust yet flexible insight that can be adapted to the nature scale and requirements of the incident Incidents involving tunnels and underground structures may place significant demands on local fire and rescue services and have often required a national co ordinated response from across the country This type of incident may generate intense media attention where the operations of the emergency services are rigorously scrutinised Whilst much of this attention is approving it will invariably focus on the preparedness of the emergency services and their operational effectiveness Fire and Rescue Service Great Britain: Parliament: House of Commons: Communities and Local Government Committee, 2006-07-12 The Government detailed its plans to reform and modernise the Fire and Rescue Service FRS in its White Paper Cm 5808 ISBN 0101580827 published in June 2003 and these subsequently became law under the

Reducing the costs for procuring fire and rescue service vehicles and specialist equipment Great Britain: National Audit Office, 2010-07-23 Firebuy a specialist body established by the Department for Communities and Local Government to support procurement of kit by Fire and Rescue Services has cost nearly twice as much to set up and run as the total savings it claims to have delivered Without the power to make local Fire and Rescue Services use its national procurement contracts Firebuy has had to rely on persuasion Progress has therefore been slow with only five out of the 14 framework contracts it has set up being used by more than half Fire and Rescue Services to purchase equipment Most of the contracts allow suppliers to offer many variations of the same types of equipment allowing Fire and Rescue Services to procure expensive bespoke equipment and preventing suppliers offering lower prices through high volume orders The approach to measuring savings achieved by

Firebuy is inadequate and the information that the estimated savings are based on is mostly unreliable The Department expected Firebuy to be self financing by its third year of operation 2008 09 but it is still heavily reliant on grants from the Department Firebuy is expensive to run with overheads between five per cent and 10 per cent higher than the industry norm The Department has not shown enough leadership direction or oversight of Firebuy to ensure it achieved its original objectives most of which were not monitored only 29 of 66 targets were monitored and many were not met **New**

Dimension, Enhancing the Fire and Rescue Services' Capacity to Respond to Terrorist and Other Large-scale Incidents Great Britain. National Audit Office, 2008 The 330 million New Dimension programme has enhanced the 46 English Fire and Rescue Services capacity to respond to terrorist attacks and other catastrophic incidents such as major flooding But better value for money could have been secured in the procurement of the specialist vehicles and equipment The programme was introduced following the terrorist attacks of September 11 2001 It involved procuring specialist vehicles and equipment training 10 000 fire fighters and helping to prepare Fire and Rescue Services to tackle terrorist and other major incidents The equipment has already been used successfully at three major incidents to date the Buncefield fire the 2007 summer floods and at the Warwickshire warehouse collapse in November 2007 Funding uncertainty and poor programme project and financial management in the early days of the project resulted in delays in introducing the equipment and significant cost overruns A fraud of 867 200 within the programme remained undetected for 9 months and in procuring one vehicle type for example poor contracting and record keeping resulted in a delay of a year and unnecessary costs of between 3 and 8 million Improvements in programme and financial management have since been made But more still needs to be done to address weaknesses which might hamper future incident response In particular the department need to address uncertainties over the respective roles of national co ordinating bodies and develop a strategy for national and regional multi agency practice exercises **New Dimension - Enhancing the Fire and Rescue Services' Capacity to Respond to**
