Designing a Machine

Situation 2 :

You are preparing an outline of the steps to be taken in redesigning a machine. Your initial outline is given below; you are now to change and improve upon it. Some of the possible revisions you might make in this outline are presented in the items following it.

First read the outline; then answer each question by selecting the best of the five choices.

I. Identifying desirable changes

- a. Specification of improved performance and other characteristics desired in the new model.
- b. Evaluation of basic factors limiting the performance of the current model
- c. Description of the current model

II. Determining the feasibility of various desirable changes.

- a. Selecting the most promising ideas for changes.
- b. Collecting ideas regarding possible improvements.
- c. Trying out each of the proposed changes.

III. Developing new model.

- a. Combining old and new elements in a pilot model
- b. Evaluating the pilot model;
 1. Testing the pilot model
 2. Appraising the result

1. Major section II of this outline would be most improved by:

1 point

- ☐ Deleting heading C
- ☒ Reversing the order of headings A and C
- ☐ Making heading C one subheading under A
- ☐ Deleting heading A.
- ☐ Reversing the order of headings A and B.

Flanagan Exam Samples:

Reading Assessment Melissa Lee Farrall, 2012-06-05 A groundbreaking integrated approach to reading assessment that addresses each child's unique Learning Profile. Fifteen to twenty percent of our nation's children have reading difficulties. Educational evaluators must be able to use progress monitoring and diagnostic tools effectively to identify students who may be at risk, evaluate the effectiveness of school-wide reading programs, and suggest interventions that will improve reading skills. Written from a strengths-based perspective, *Reading Assessment: Linking Language, Literacy, and Cognition* is the first book of its kind to present a research-based integrated review of reading cognition and oral language testing and assessment. Author Melissa Lee Farrall explores the theoretical underpinnings of reading language and literacy, explains the background of debates surrounding these topics, and provides detailed information and administration tips on the wide range of reading inventories and standardized tests that may be used in a reading psychoeducational assessment. With a focus on how to craft professional evaluation reports that illuminate a student's strengths, not just weaknesses, *Reading Assessment* enables school psychologists and diagnosticians, reading specialists, and special education professionals to conduct evaluations and develop effective interdisciplinary remedial recommendations and interventions. Clear, engaging, and inviting, *Reading Assessment* features case examples and practice exercises, chapter opening reviews of each theory, strengths, weaknesses, and potential problems of tests and their interpretations, chapter ending review questions that foster skill development and critical thinking, comprehensive information on more than 50 different assessment tests. *Reading Assessment* is an invaluable resource that helps professionals gain the knowledge and skills to confidently interpret test results and prepare detailed and effective evaluation reports designed to meet each child's unique needs as a learner. [Using National Data Bases in Educational Research](#)

Thomas L. Hilton, 2012-12-06

This book's purpose is to enable educational researchers to make better use of the huge longitudinal and cross-sectional data files that are now readily available. Of value to experienced researchers and undergraduates alike, the book focuses primarily on the planning and design of research rather than implementation of data base information. Its chapters address a variety of vital questions including: What variables are present in each of the major national data bases? What are the problems and dangers in making comparisons across data bases? What factors invalidate comparisons of test scores across data bases? In what ways can data from certain data bases be physically merged with data from other data bases? This text clearly demonstrates what can be done with large national data bases and perhaps equally important, what cannot be done or done only if certain precautions are taken.
