Computer Networking: Network+ Certification Study Guide for N10-008 Exam
Richie Miller, 2022-11-22 If you want to PASS the CompTIA Network Certification this book is for you The Network credential is the first certification that many IT professionals ever receive It has been around for over 25 years at this point and has been awarded to over a million applicants during that time and this matter because the certification has become well known by IT employers When you re looking for a job and you have the Network after your name most companies know that that s a real credential It s also a vendor neutral credential in the sense that it doesn t promote any particular hardware or software vendor and although the exams do recognize and reflect the prominence of Microsoft Windows in the corporate world they also include limited content on Apple operating systems Linux Android and Chrome OS Because Apple s operating systems only run on Apple hardware the exams do cover Macs iPhones and iPads It s fair to say that the CompTIA Network exams try to reflect the hardware and software that a technical support professional is likely to see in real life and that s part of its relevance and appeal In a nutshell the Network certification is the preferred performance based qualifying credential for technical support and IT operational roles according to the organization that manages it CompTIA The Network certification focuses on the day to day work of an IT technician in a business environment One reason the Network certification receives respect by IT employers is that it is accredited by international organizations The ISO or International Standards Organization is a worldwide standard setting group headquartered in Geneva and ANSI the American National Standards Institute is the USA s representative to ISO CompTIA has been accredited by ANSI for compliance with the ISO standard that applies to operating a certification body or organization and CompTIA must maintain certain quality levels in order to maintain that accreditation That s a bit of background on CompTIA and the Network certification But who might benefit from this credential Well anyone wanting to be hired on by a company that requires it certainly but more broadly anybody pursuing a career in tech support for example as a help desk analyst service desk analyst or a desktop support technician
