

THE COMPONENTS THAT YOU WILL REQUIRE TO CONSTRUCT THIS SETUP (WE HAVE CHOSEN CAMO LEADCORE FOR THE LEADER).

INLINE LEAD DROP-OFF

As the use of solid PVA bags continues to grow in popularity, so does the use of inline leads, which are the preferred lead of choice for such a tactic. A drawback of an inline lead however, is that they are designed to be fished running on the line and therefore cannot be ejected. That of course is unless you incorporate the new Inline Drop-Off Kit, which forms part of the impressive Edges range from Fox. This setup is very quick and effective and can be used on main line fished straight through or on an Armadillo braided leader, Submerge lead-free leader or on the more traditional leadcore leader.

HOW TO SET UP THE INLINE LEAD DROP-OFF RIG

Attach an Edges Kwik Change Inline Drop-Off Swivel to one end of your leader.

Next, thread one of the inserts from the Inline Drop-Off Kit onto your leader.

Take an Inline Flat Pear lead, remove the soft rubber insert and cut off the thin tail.

Now place the thick 'grommet' over the eye of the swivel on your leader as shown here.

Place the 'grommet' complete with swivel into the wider end of the inline lead, like so.

Run the leader around the outside of the lead and place in the insert into the top of the lead.

You can then slide one of the tail rubbers supplied in the Drop-Off Kit over the insert.

Attach your chosen hooklink and your inline drop off setup is ready for action.

When the lead ejects you only lose the lead and retain the other components.

TOPEDGE

By removing the tail rubber from the insert you will drastically reduce the amount of pressure required to eject the lead.
