Chemistry A Forensic Science Perspective remains the only book that uses the inherently fascinating topics of crime and criminal investigations as a context for teaching the fundamental chemical concepts most often covered in an introductory nonmajors course. Covering all the standard topics, Matthew Johll capitalizes on the surge of interest in the scientific investigation of crime as sparked by CSI and other television shows, bringing together the theme of forensic science and the fundamentals of chemistry in ways that are effective and accessible for students. This edition features refined explanations of the chemical concepts which are the core of the book, as well as a more thoroughly integrated forensic theme, updated features, and an expanded media supplements package.

This edited book, based on material presented at the EU Spec Training School on Multiple Scattering Codes and the following MSNano Conference, is divided into two distinct parts. The first part, subtitled 'basic knowledge', provides the basics of the multiple scattering description in spectroscopies, enabling readers to understand the physics behind the various multiple scattering codes available for modelling spectroscopies. The second part, 'extended knowledge', presents state-of-the-art short chapters on specific subjects associated with improving the actual description of spectroscopies within the multiple scattering formalism, such as inelastic processes or precise examples of modelling.
