Narendra,2023-03-10 In September of 2022 India s GDP

crossed that of Britain to make it the world s fifth largest economy For a country that had been struggling with slow growth for decades it was a significant moment The tipping point that moment when a process of change is initiated which will transform how we think behave or live came in the summer of 1991 under the leadership of someone considered the person least likely to launch such a change The government of P V Narasimha Rao who had just turned 70 announced a series of measures that have today placed India among the top economies This was not all The five years of his prime ministership from 1991 to 1996 were marked by several other changes whose impact continues to be felt Alongside devastating events like the Babri Masjid demolition and tackling bitter politics in a divided Congress party S Narendra was a close associate through this period and sheds light on many key events and the internecine rivalries and politics that Rao had to counter to be able to function He was a cog in the wheel of bigger things but perfectly placed to see what happened in the grey area between policy making administration and politics and to explain at least in part the actions of the man at the centre of it all This is a first hand indispensable account of history in the making      **Routledge Library Editions: Artificial Intelligence**

Various,2021-06-23 Artificial Intelligence AI a term coined in the 1950s actually dates back as far as 1943 Now very much in the public consciousness AI research has fallen in and out of favour over the years Routledge Library Editions Artificial Intelligence 10 Volumes brings together as one set or individual volumes a small interdisciplinary series of previously out of print titles originally published between 1970 and 1994 Covering ground in computer science literature philosophy psychology psychotherapy and sociology this set is a fascinating insight into the development of ideas surrounding AI

Miscellaneous Publication - National Bureau of Standards United States. National Bureau of Standards,1965      **Link** ,1975      *From Gutenberg to the Internet* Jeremy M. Norman,2005 From Gutenberg to the Internet presents 63 original readings from the history of computing networking and telecommunications arranged thematically by chapters Most of the readings record basic discoveries from the 1830s through the 1960s that laid the foundation of the world of digital information in which we live These readings some of which are illustrated trace historic steps from the early nineteenth century development of telegraph systems the first data networks through the development of the earliest general purpose programmable computers and the earliest software to the foundation in 1969 of ARPANET the first national computer

network that eventually became the Internet The readings will allow you to review early developments and ideas in the history of information technology that eventually led to the convergence of computing data networking and telecommunications in the Internet The editor has written a lengthy illustrated historical introduction concerning the impact of the Internet on book culture It compares and contrasts the transition from manuscript to print initiated by Gutenberg s invention of printing by moveable type in the 15th century with the transition that began in the mid 19th century from a print centric world to the present world in which printing co exists with various electronic media that converged to form the Internet He also provided a comprehensive and wide ranging annotated timeline covering selected developments in the history of information technology from the year 100 up to 2004 and supplied introductory notes to each reading Some introductory notes contain supplementary illustrations
