**Forensic Archaeology** John Hunter, Margaret Cox, 2005 This updated edition of a textbook universally hailed as an indispensable guide is a complete introduction to the methods and means of forensic archaeology Incorporating new advances in the field new case studies and charting the growth and development of the subject Forensic Archaeology examines the four main fields of recovery search skeletal analysis and analytical science and how the concepts and methods

of traditional archaeology can be utilized within criminal investigations. The authors provide in depth chapters that discuss search and location, the various constraints and issues posed by an increasingly complex legal environment, the archaeology of individual and mass graves, how the subject has evolved to include international investigations of human rights links with forensic anthropology, forensic geophysical survey. This is an invaluable resource that will provide students, researchers, academics and the general reader alike with a fascinating introduction to this complex and crucial subject. *The Routledge Handbook of Archaeological Human Remains and Legislation* Nicholas Marquez-Grant, Linda Fibiger, 2011-03-21

Methodologies and legislative frameworks regarding the archaeological excavation, retrieval, analysis, curation and potential reburial of human skeletal remains differ throughout the world. As work forces have become increasingly mobile and international research collaborations are steadily increasing, the need for a more comprehensive understanding of different national research traditions, methodologies and legislative structures within the academic and commercial sector of physical anthropology has arisen. The Routledge Handbook of Archaeological Human Remains and Legislation provides comprehensive information on the excavation of archaeological human remains and the law through 62 individual country contributions from Europe, Asia, Africa, North America, South America and Australasia. More specifically, the volume discusses the following: What is the current situation including a brief history of physical anthropology in the country? What happens on discovering human remains? Who is notified etc? What is the current legislation regarding the excavation of archaeological human skeletal remains? Is a license needed to excavate human remains? Is there any specific legislation regarding excavation in churchyards? Any specific legislation regarding war graves? Are physical anthropologists involved in the excavation process? Where is the cut off point between forensic and archaeological human remains e.g. 100 years, 50 years, 25 years? Can human remains be transported abroad for research purposes? What methods of anthropological analysis are mostly used in the country? Are there any methods created in that country which are population specific? Are there particular ethical issues that need to be considered when excavating human remains such as religious groups or tribal groups? In addition, an overview of landmark anthropological studies and important collections are provided where appropriate. The entries are contained by an introductory chapter by the editors which establish the objectives and structure of the book, setting it within a wider archaeological framework and a conclusion which explores the current European and world wide trends and perspectives in the study of archaeological human remains. The Routledge Handbook of Archaeological Human Remains and Legislation makes a timely, much needed contribution to the field of physical anthropology and is unique as it combines information on the excavation of human remains and the legislation that guides it alongside information on the current state of physical anthropology across several continents. It is an indispensable tool for archaeologists involved in the excavation of human remains around the world.
