FR-820
FRANCAISE L'ESPAGNOL

1. General Description

The FR-820 is a scientific calculator with a liquid crystal display (LCD) showing 12 digits. It features a variety of functions including trigonometric, logarithmic, and exponential calculations. The calculator is powered by a single 1.5V AAA battery and has a compact, portable design.

The calculator is designed for use in both French and Spanish. It includes a power switch and a display window that shows the results of calculations. The keypad contains various function keys for different mathematical operations.

2. Read the Instructions

Before using the calculator, please read the instructions carefully. This manual provides detailed information about the calculator's features and how to use them. It also includes safety precautions to ensure the safe use of the device.

3. General Mode Selection

The calculator has several modes for different types of calculations. To select a mode, press the appropriate function key. The display will show the selected mode and any necessary settings.

4. Operating the Power Switch

The power switch is located on the side of the calculator. It is used to turn the calculator on and off. Pressing the switch will activate the calculator, and pressing it again will turn it off.

The calculator will automatically turn off the display after a period of inactivity to conserve battery power.

5. Functions and Operations

The calculator supports a wide range of mathematical functions. These include basic arithmetic operations (addition, subtraction, multiplication, division), trigonometric functions (sine, cosine, tangent), and logarithmic functions (natural log, base 10 log). It also includes memory functions for storing and recalling values.

The calculator also features a constant function for repeating calculations with the same constant value. It includes a power-off function to save battery life.

6. Operation for the calculator

To perform a calculation, enter the numbers and operators in the correct order. Press the equals key to get the result. The display will show the result of the calculation.

7. Memory Functions

The calculator has a memory function for storing and recalling values. Press the memory key to store a value, and press it again to recall the value. This is useful for complex calculations involving multiple steps.

8. Calculation of units and angles

The calculator can perform calculations involving units and angles. It includes a unit conversion function and an angle mode selector. This allows for easy conversion between different units and angles.

The calculator also includes a function for calculating the area of a circle and the volume of a cylinder. These functions are useful for engineering and scientific calculations.

9. Operating the LCD Display

The LCD display shows the results of calculations. It is a liquid crystal display that is easy to read. The display shows 12 digits and various symbols for error messages.
