LEARNING ACTIVITY 3.1

I- Solve the following problem:

1. Having freckles is dominant (F) over not having freckles (f), attached earlobes is dominant (A) over non-attached earlobes (a). Jay is homozygous dominant for freckles and heterozygous for attached earlobes. Angel is heterozygous for freckles and is homozygous for attached earlobes. **(Show your solution) 10 points.**

A. What is the genotype of Jay?

-FF, Aa

B. What is the genotype of Angel?

-Ff, AA

C. What are the genotypes and phenotypes of their children?

Genotype: FF, Ff, AA, Aa

Phenotype: Having freckles, attached earlobes

Solution:

	F	F
F	FF	FF
f	Ff	Ff

	A	a
A	AA	Aa
A	AA	Aa

D. Determine the genotypic and phenotypic ratio.

-Genotypic ratio: 2FF:1Ff:0ff and 2AA:1Aa:0aa

-Phenotypic ratio: 3 Having freckles: 0 not having freckles and 3 attached earlobes: 0 non-attached earlobes.

The Oxford Handbook of Expertise Paul Ward, Jan Maarten Schraagen, Julie Gore, Emilie M. Roth, 2020 The Oxford Handbook of Expertise provides a comprehensive picture of the field of Expertise Studies It offers both traditional and contemporary perspectives and importantly a multidiscipline multimethod

view of the science and engineering research on expertise *Genetic Programming* John R. Koza, 1992 In this ground breaking book John Koza shows how this remarkable paradigm works and provides substantial empirical evidence that solutions to a great variety of problems from many different fields can be found by genetically breeding populations of computer programs Genetic programming may be more powerful than neural networks and other machine learning techniques able to solve problems in a wider range of disciplines In this ground breaking book John Koza shows how this remarkable paradigm works and provides substantial empirical evidence that solutions to a great variety of problems from many different fields can be found by genetically breeding populations of computer programs Genetic Programming contains a great many worked examples and includes a sample computer code that will allow readers to run their own programs In getting computers to solve problems without being explicitly programmed Koza stresses two points that seemingly different problems from a variety of fields can be reformulated as problems of program induction and that the recently developed genetic programming paradigm provides a way to search the space of possible computer programs for a highly fit individual computer program to solve the problems of program induction Good programs are found by evolving them in a computer against a fitness measure instead of by sitting down and writing them **Chemistry3** Andrew Burrows, John Holman, Simon Lancaster, Andrew Parsons, Tina Overton, Gwen Pilling, Gareth Price, 2021 Chemistry is widely considered to be the central science it encompasses concepts on which all other branches of science are developed Yet for many students entering university gaining a firm grounding in chemistry is a real challenge Chemistry3 responds to this challenge providing students with a full understanding of the fundamental principles of chemistry on which to build later studies Uniquely amongst the introductory chemistry texts currently available Chemistry3's author team brings together experts in each of organic inorganic and physical chemistry with specialists in chemistry education to provide balanced coverage of the fundamentals of chemistry in a way that students both enjoy and understand The result is a text that builds on what students know already from school and tackles their misunderstandings and misconceptions thereby providing a seamless transition from school to undergraduate study Written with unrivalled clarity students are encouraged to engage with the text and appreciate the central role that chemistry plays in our lives through the unique use of real world context and photographs Chemistry3 tackles head on two issues pervading chemistry education students mathematical skills and their ability to see the subject as a single unified discipline Instead of avoiding the maths Chemistry3 provides structured support in the form of careful explanations reminders of key mathematical concepts step by step calculations in worked examples and a Maths Toolkit to help students get to grips with the essential mathematical element of chemistry Frequent cross references highlight the connections between each strand of chemistry and explain the relationship between the topics so students can develop an understanding of the subject as a whole Digital formats and resources Chemistry3 is available for students and institutions to purchase in a variety of formats and is supported by online resources The e book offers a mobile experience and convenient
