from An Inductive Manual of the Straight Line and the Circle With Many Exercises This manual is published to supply a need which its author has long felt in the instruction of his own classes for some other mode of teaching geometry than the purely deductive which is almost exclusively followed in most of our text books of to day That method seems in many cases to fail to give clear ideas to the young beginner in geometry and to involve the whole subject in a haze which it takes a considerable time to clear away In too many cases because he fails to comprehend the reasoning employed he becomes discouraged and putting aside all confidence in his own powers of thought he attempts to convince himself that such and such things must be true because the book says so a basis for opinion which is it must be confessed even more unsatisfactory in geometry than it is In other things with which we concern ourselves About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works [A New Manual of Method - Scholar's Choice Edition](#) Alfred Hezekiah Garlick,2015-02-18 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work As a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant
