Empire and Catastrophe Spencer D. Segalla,2021-05-01 Spencer D Segalla examines natural and anthropogenic disasters during the years of decolonization in Algeria Morocco and France and explores how environmental catastrophes impacted the dissolution of France s empire in North Africa      *Constructing the U.S. Rapprochement with China, 1961-1974* Evelyn Goh,2004-11-22 With Nixon s historic reconciliation with China in 1972 Sino American relations were restored and China moved from being regarded as America s most implacable enemy to a friend and tacit ally Existing accounts of the rapprochement focus on the shifting balance of power between the USA China and the Soviet Union but in this book Goh

argues that they cannot adequately explain the timing and policy choices related to Washington's decisions for reconciliation with Beijing. Instead, she applies a more historically sensitive approach that privileges contending official American constructions of China's identity and character. This book demonstrates that ideas of reconciliation with China were already being propagated and debated within official circles in the USA during the 1960s. It traces the related policy discourse and imagery and examines their continuities and evolution into the early 1970s that facilitated Nixon's new policy. The Routledge Handbook of New Security Studies J. Peter Burgess, 2010-01-22. This new Handbook gathers together state of the art theoretical reflection and empirical research by a group of leading international scholars in the subdiscipline of Critical Security Studies. In today's globalised setting the challenge of maintaining security is no longer limited to the traditional foreign policy and military tools of the nation state and security and insecurity are no longer considered as dependent only upon geopolitics and military strength but rather are also seen to depend upon social economic environmental ethical models of analysis and tools of action. The contributors discuss and evaluate this fundamental shift in four key areas: New security concepts, New security subjects, New security objects, New security practices. Offering a comprehensive theoretical and empirical overview of this evolving field, this book will be essential reading for all students of critical security studies, human security, international global security, political theory and IR in general. J. Peter Burgess is Research Professor at PRIO, the International Peace Research Institute Oslo, where he leads the Security Programme and edits the interdisciplinary journal *Security Dialogue*. In addition, he is Adjunct Professor at the Norwegian University of Science and Technology, Trondheim, NTNU, and Research Fellow at the Institute for European Studies, Brussels.

**Thailand in the Cold War** Matthew Phillips, 2015-09-16. Thailand's position during the Cold War was ambiguous: the country's political leadership was very keen to maintain the country's independence on the world stage yet at the same time was anxious to establish the country's credentials as staunchly anti-communist. However, as this book argues, Thailand, though never formally a client state of the United States, was very closely embedded in the Western camp through the commitment of Thailand's cosmopolitan urban communities to developing a modern consumerist lifestyle. Considering popular culture including film, literature, fashion, tourism, and attitudes towards Buddhism, the book shows how an ideology of consumerism and integration into a free world culture centred in the United States gradually took hold and became firmly established, and how this popular culture and ideology was fundamental in determining Thailand's international political alignment. Geopolitics, Geography and Strategic History Geoffrey Sloan, 2017-02-17. This work explains the course of international politics from the rebirth of the German Empire to the rise of China, with particular though not exclusive reference to spatial relationships.
