The conclusion puts forward a proposal an ethical blueprint for identifying the principles Security Accountability Fairness Explainability Transparency and Privacy to be observed when processing Big Data for food safety purposes including by means of machine learning Possible implementations are then discussed also in connection with two recent legislative proposals namely the Data Governance Act Global Encyclopedia of Public Administration, Public Policy, and Governance Ali and the Artificial Intelligence Act Farazmand, 2023-04-05 This global encyclopedic work serves as a comprehensive collection of global scholarship regarding the vast fields of public administration public policy governance and management Written and edited by leading international scholars and practitioners this exhaustive resource covers all areas of the above fields and their numerous subfields of study In keeping with the multidisciplinary spirit of these fields and subfields the entries make use of various theoretical empirical analytical practical and methodological bases of knowledge Expanded and updated the second edition includes over a thousand of new entries representing the most current research in public administration public policy governance nonprofit and nongovernmental organizations and management covering such important sub areas as 1 organization theory behavior

Privacy on the Ground Kenneth A. Bamberger, Deirdre K. Mulligan, 2015-10-23 An examination of corporate privacy management in the United States Germany Spain France and the United Kingdom identifying international best practices and making policy recommendations Barely a week goes by without a new privacy revelation or scandal Whether by hackers or spy agencies or social networks violations of our personal information have shaken entire industries corroded relations among nations and bred distrust between democratic governments and their citizens Polls reflect this concern and show majorities for more broader and stricter regulation to put more laws on the books But there was scant evidence of how well tighter regulation actually worked on the ground in changing corporate or government behavior until now This intensive five nation study goes inside corporations to examine how the people charged with protecting privacy actually do their work and what kinds of regulation effectively shape their behavior And the research yields a surprising result The countries with more ambiguous regulation Germany and the United States had the strongest corporate privacy management practices despite very different cultural and legal environments The more rule bound countries like France and Spain trended instead toward compliance processes not embedded privacy practices At a crucial time when Big Data and the Internet of Things are snowballing Privacy on the Ground helpfully searches out the best practices by corporations provides guidance to policymakers and offers important lessons for everyone concerned with privacy now and in the future Sustainable **Aquaculture** Faisal I.
